# **2019 energy storage field explosion**

## Overview

---

What happened at an Arizona energy storage facility?

In April 2019, an unexpected explosion of batteries on fire in an Arizona energy storage facility injured eight firefighters.

What happened at a battery energy storage system?

By Janelle Foskett COLUMBIA, Md. — The UL Firefighter Safety Research Institute (FSRI) today released a report investigating a 2019 explosion that injured eight firefighters at a battery energy storage system (ESS) facility. The deflagration incident occurred at a 2.16-MWh lithium-ion battery ESS facility in Surprise, Ariz.

Is FSRI investigating near-miss lithium-ion battery energy storage system explosion?

FSRI releases new report investigating near-miss lithium-ion battery energy storage system explosion.

What happened at McMicken energy storage?

That is one of the conclusions of a report released on Monday about the April 2019 explosion at the McMicken Energy Storage facility near Grand Avenue and Deer Valley Road, owned by Arizona Public Service Co.

Did ESS deflagrate a lithium-ion battery energy storage system?

This report details a deflagration incident at a 2.16 MWh lithium-ion battery energy storage system (ESS) facility in Surprise, Ariz.

## 2019 energy storage field explosion

---

### Battery Energy Storage System (BESS) fire and ...

Furthermore, as outlined in the US Department of Energy's 2019 "Energy Storage Technology and Cost Characterization Report", lithium-ion batteries emerge as the optimal choice for a 4-hour energy ...

### TECHNICAL SUPPORT FOR APS RELATED TO ...

Davion M. Hill, Ph.D., Energy Storage Leader US, DNV GL, was retained by Arizona Public Service Company (APS) as an expert consultant, to provide technical advice and analysis ...

### Explosion-venting overpressure structures and hazards of lithium ...

For example, in April 2019 in Arizona, USA, a massive battery energy storage system (EES) exploded, injuring eight firefighters [4]; In April 2021, a tragic incident involving a ...

### [Microsoft Word](#)

This paper shows the experimental results and findings of field explosion tests conducted to obtain fundamental data concerning the explosion of hydrogen-air mixtures. A tent covered ...

Energy Storage Safety Monitor

April 2019 "The McMicken disaster unfolded in two distinct but related events. First, a single battery rack caught fire and burned -- an occurrence that battery engineers refer to as thermal ...

**Nation's First Master's Program in Explosion Protection ...**

Notable examples include the BP Deepwater Horizon explosion (2010), the Merrimack Valley gas explosions in Massachusetts (2016), and the Surprise, Arizona energy ...

**1075KWHH ESS**

**APS battery explosion in Arizona: New report tells ...**

That is one of the conclusions of a report released on Monday about the April 2019 explosion at the McMicken Energy Storage facility near Grand Avenue and Deer Valley Road, owned by Arizona

## Four Firefighters Injured In Lithium-Ion Battery Energy ...

1 Executive Summary On April 19, 2019, one male career Fire Captain, one male career Fire Engineer, and two male career Firefighters received serious injuries as a result of cascading ...

## Thermal runaway likely caused explosion at APS ...

PHOENIX (AP) - A "thermal runaway" likely caused the April 2019 explosion at a battery storage facility west of Phoenix that injured eight Peoria firefighters, according to a new report

## Energy Storage Safety Monitor

October 2019 Norwegian authorities are warning ship-owners and operators about the dangers associated with lithium-ion battery systems after a fire and subsequent gas explosion on board ...

## LG Chem refutes alleged cause of explosion at APS battery ...

LG Chem disputes APS's claim that a battery cell failure initiated an April 2019 explosion, alleging an external heat source is the root cause.

## TECHNICAL SUPPORT FOR APS RELATED TO ...

As is typical in the energy storage industry, APS evaluated multiple bids from different engineering, procurement, and construction (EPC) contractors for their energy storage systems.

## Lithium ion battery energy storage systems (BESS) hazards

Lithium-ion batteries are electro-chemical energy storage devices with a relatively high energy density. Under a variety of scenarios that cause a short circuit, batteries can ...

## Battery Energy Storage System (BESS) fire and explosion ...

Furthermore, as outlined in the US Department of Energy's 2019 "Energy Storage Technology and Cost Characterization Report", lithium-ion batteries emerge as the ...

## Thermal runaway likely caused explosion at APS battery facility in

PHOENIX (AP) - A "thermal runaway" likely caused the April 2019 explosion at a battery storage facility west of Phoenix that injured eight Peoria firefighters, according to a new ...

## Arizona ESS Explosion Reports , NFPA

Reports on the Arizona ESS explosion and related injuries provide insights into safety measures and investigation findings for energy storage systems.

## UL FSRI releases report on battery facility ...

-- The UL Firefighter Safety Research Institute (FSRI) today released a report investigating a 2019 explosion that injured eight firefighters at a battery energy storage system (ESS)

## Battery Energy Storage Systems Explosion Hazards

INTRODUCTION Lithium ion battery energy storage systems (BESSs) are increasingly used in residential, commercial, industrial, and utility systems due to their high energy density, ...

## Hydrogen energy, economy and storage: Review and ...

The hydrogen economy is a proposed system where hydrogen is produced and used extensively as the primary energy carrier. Successful development of hydrogen economy ...

## Dispute Erupts Over What Sparked an Explosive Li-ion Energy Storage

The April 2019 accident near Phoenix put plans on hold to further deploy battery energy-storage systems across Arizona

## The NFPA Podcast: The Surprise Battery Explosion

In 2019, a massive explosion rocked an energy storage facility in Surprise, Arizona, sending four firefighters to the hospital. With ever more powerful energy storage ...

## APS Details Cause of Battery Fire and Explosion, Proposes ...

The explosion revealed that lithium-ion batteries can be dangerous, even in the hands of experienced professionals like APS, storage vendor Fluence and battery ...

## Report: Four Firefighters Injured In Lithium-Ion Battery Energy ...

On April 19, 2019, one male career Fire Captain, one male career Fire Engineer, and two male career Firefighters received serious injuries as a result of cascading thermal ...

## New York Battery Energy Storage System Guidebook for

...

As an important first step in protecting public and firefighter safety while promoting safe energy storage, the New York State Energy Research and Development Authority (NYSERDA)

...

## Emerging Hazards of Battery Energy Storage System Fires

In April 2019, an unexpected explosion of batteries on fire in an Arizona energy storage facility injured eight firefighters. More than a year before that fire, FEMA awarded a ...

## What We Know and Don't Know About the Fire at an APS Battery Facility

The explosion in Arizona comes at a sensitive time for the fledgling storage industry, with a number of U.S. states moving to make storage central to their grid planning. ...

LPW48V100H  
48.0V or 51.2V

## APS battery energy storage facility explosion injures four

...

Share To: Last Friday evening in Surprise, Arizona, a storage facility owned by Arizona Public Service (APS) exploded, injuring four firefighters.

## Explosion Control Guidance for Battery Energy Storage ...

EXECUTIVE SUMMARY Lithium-ion battery (LIB) energy storage systems (BESS) are integral to grid support, renewable energy integration, and backup power. However, they present ...

## Dispute Erupts Over What Sparked an Explosive Li-ion Energy ...

The April 2019 accident near Phoenix put plans on hold to further deploy BESS across Arizona and led to a public airing of conflicting root cause reports issued by the utility ...

## Firefighters injured in APS explosion acted 'in ...

More up-to-date training could have prevented severe injuries sustained by four firefighters in the April 2019 fire and explosion at battery storage facility in Arizona, according to a report into the incident ...

## Assessment and prevention of combustion and explosion risk in

This review summarizes the characteristics of energy storage systems in underground spaces, especially the thermal runaway of individual lithium-ion batteries, which ...
