ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

Overview

In July 2008, the ODA and Stratford City Development (SCDL) contracted Cofely East London Energy (previously Elyo) to build the two energy centres following a competitive tender process. Cofely, an energy service.

When was London power station built?

The power station was constructed on the riverside site of a former tram depot operated by the London Tramways Company (and before that by the Pimlico Peckham & Greenwich Street Tramway Company, taken over in 1873). An act of Parliament, the London County Council (Tramways and Improvements) Act 1902 (2 Edw. 7. c.

What is London Underground's emergency power supply?

Originally constructed to supply power for London's tram system, since 1988 it has been London Underground 's central emergency power supply, providing power if there is partial or total loss of National Grid supplies.

How many volts is a London Underground generator?

These originally burned oil, but were later converted to burn oil and gas. The generators are still housed in what was formerly the boiler house. They have a total capacity of 117.6 megawatts (MW), generated at 11,000 volts. This voltage can be increased to 22,000 volts for connection to the London Underground electricity system.
