# **Botswana is a safe country for energy storage**

## Overview

---

The World Bank Group has approved plans to develop Botswana's first utility-scale battery energy storage system (BESS) with 50MW output and 200MWh storage capacity. The World Bank will support the 4-hour duration BESS via a loan of US\$88 million. It will also receive a US\$30 million loan and a US\$4.

The World Bank Group has approved plans to develop Botswana's first utility-scale battery energy storage system (BESS) with 50MW output and 200MWh storage capacity. The World Bank will support the 4-hour duration BESS via a loan of US\$88 million. It will also receive a US\$30 million loan and a US\$4.

The Botswana energy storage project is quietly becoming Africa's dark horse in the clean energy race. As of March 2025, this \$120 million initiative has already deployed enough battery capacity to power 15,000 homes during peak demand. Not bad for a project that started as scribbles on a napkin.

Welcome to Botswana's energy storage field, where innovation meets necessity. With 300+ days of annual solar irradiance, you'd think Botswana would be the Dubai of renewables. But here's the twist—the real game isn't just generating power; it's storing it for when the sun clocks out. Let's unpack. Does Botswana have a good electricity supply?

According to Statistics Botswana, local electricity generation and distribution has showed a slight improvement, increasing by 10.2 percent from 807,943 MWh during the fourth quarter of 2022 to 890,655 MWh during the first quarter of 2023. The increase was attributable to the performance improvement of Morupule A and B power stations.

Is Botswana a safe place to live?

Botswana is a place where people are very friendly and the crime rate is low\*. However,\*, crime has been on the rise over the past several years\*, so always be aware of your surroundings. Basic common sense will keep you safe from crime and the predatory wildlife in rural areas.

Where does Botswana get its power?

In 2023, BPC agreed to procure up to 600 MW of power generation from a yet-to-be-built coal-fired power station. Additionally, Botswana imports the bulk of its power from South African utility Eskom, and the rest from Nampower (Namibia), Zesco (Zambia), and the Southern African Power Pool (SAPP), to make up for any production shortfalls.

Is natural gas a good investment in Botswana?

Substantial natural gas reserves (coalbed methane) exist in Central and Northeast Botswana. Once fully developed, the natural gas deposits could generate substantial downstream opportunities for new natural gas intensive equipment and services. Botswana Department of Customs and Excise. This is a best prospect industry sector for this country.

How is Botswana strengthening its exporting capacity?

To strengthen Botswana's exporting capacity, the GoB is investing in national and regional grid infrastructure, as well as refurbishment of general transmission infrastructure. Botswana Power Corporation (BPC)'s rural electrification program is still ongoing, and this covers new connections and expansion in some villages.

How much solar energy does Botswana use?

Botswana has tremendous potential for solar energy utilization, with an annual Direct Normal Irradiation equivalent of 3,000 kWh/m<sup>2</sup>/a in most parts of the country, with an average insolation on a horizontal surface of 21 MJ/ m<sup>2</sup>.

## Botswana is a safe country for energy storage
