Bunker power storage

Overview

What is bunker wall storage?

Bunker wall storage is a low cost solution for temporary grain storage that can be put up quickly and provides the storage needed during harvest time. Our bunker walls are professionally engineered and are specifically designed to work with grain aeration equipment.

How secure is the bunker storage facility?

The Bunker Storage facility is secured and protected by monitored CCTV cameras, keypad access controlled gate entry and security patrols at night and on weekends. Each storage unit is protected by a steel roller door, and locked by the storage renter.

How does bunker storage work?

Bunker Storage presents wide driveways, giving easy access to trucks and delivery vehicles. Vehicle access is available to all storage units, and you can load and unload directly into your storage area. Bunker Storage offers plenty of parking on site, large double entry security gates, and access directly from Brays Lane.

Does bunker storage have vehicle access?

Vehicle access is available to all storage units, and you can load and unload directly into your storage area. Bunker Storage offers plenty of parking on site, large double entry security gates, and access directly from Brays Lane. Our facility also features two motorised doors for convenient disability access.

What is a waste storage bunker?

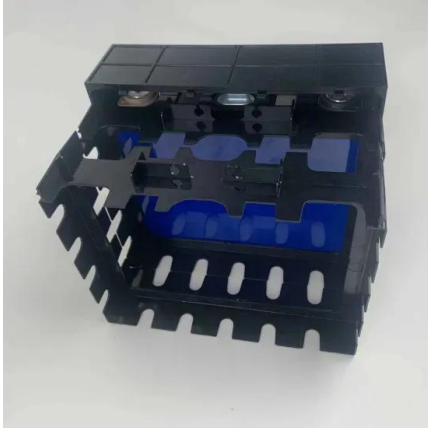

The waste storage bunker in the reception hall is an important part of the EFW incineration plant. Its purpose is to provide a place to store, buffer and uniformly mix the delivered waste and ensure a continuous supply of waste to the incinerator. A grab crane transports the waste to the feed chute of the

furnace.

What is the energy bunker?

The energy bunker is a symbol of the climate protection concept "Sustainable Wilhelmsburg". The building has solar panels on the roof and on the south side. It is an important milestone on the way to a renewable energy source for the Elbe islands.
