

Overview

Is China better than the US in AI development?

Alvin Graylin: The Silicon Valley consensus on AI previously held that the US had a one or two year lead over China in AI development. Some popular generative video and photo models from China now appear to be as good as leading US offerings.

How will China handle artificial intelligence innovation?

China is currently enacting a balancing act between pushing forward with artificial intelligence innovation while keeping control over the technology's development. All eyes are on how artificial general intelligence (AGI), or AI that is smarter than humans, develops over the coming years and how China will approach the technology.

Why is Ai a problem in China?

China was also among the first countries in the world to bring in regulation around various aspects of AI. The country's internet is heavily censored and any information that appears to go against Beijing's ideology is blocked.

Why is Ai a strategic priority for China's government?

AI is a strategic priority for the Chinese government. The country's biggest firms such as Alibaba, Huawei and Tencent have been developing their own AI models. The capabilities of those models are also advancing. China was also among the first countries in the world to bring in regulation around various aspects of AI.

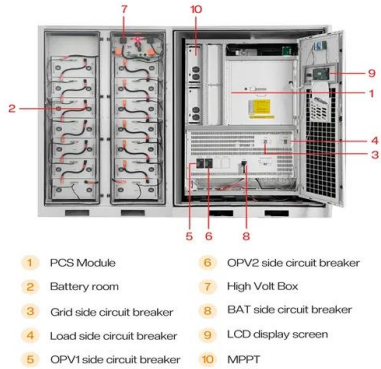

Could Ai be the next 'human-level intelligence'?

Applications like ChatGPT — that allow users to prompt a chatbot for answers — have exploded in popularity. But many AI companies are racing to develop the next level, with AI that has human-level intelligence. Sam Altman, the CEO of OpenAI, has said that AGI could be achieved by 2025.

Should the US and China collaborate in AI development?

Alvin Graylin: This type of framing suggests that any collaboration between the US and China, even in areas such as medicine and energy development, should be avoided in the name of ensuring the “dominance” of the US and allies in the development of AI.

Can chu ying beat artificial intelligence

La Capsule -- Photo Days
