Can the new equipment be repaired when stored outdoors

Overview

Is outdoor gear repair and maintenance difficult?

Outdoor gear repair and maintenance isn't difficult. And it should most definitely be part of your regular routine. Even if you only break out your tent and other gear a couple of times a year, you should give it all a good cleaning and repair check annually at the very least.

Should you repair or replace old equipment?

As you decide whether to repair or replace old equipment, you'll want to consider how TCO might change over the next few years, as new models replace the ones you're operating now. Total cost of ownership isn't the only metric you'll need to determine the cost-effectiveness of an asset.

How do you repair outdoor gear?

One easy but important way to repair outdoor gear is by re-waterproofing it. Rain jackets, snow pants, tents and more naturally lose water-repellency over time, so follow up a wash with Revivex Wash-in water repellent, which will make waterproof items and outerwear like new again so you can watch the rain just roll right off!

Can the new equipment be repaired when stored outdoors
