## HEAT DISSIPATION

Cold aisle containment,  
making optimal refrigeration effect;

## Overview

---

What is energy storage Canada?

Energy Storage Canada (ESC) is a not-for-profit organisation dedicated solely to the growth and market development of the country's energy storage sector as a means of accelerating the realisation of Canada's ongoing energy transition and Net Zero goals.

How big is Canada's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Canada had 138MW of capacity in 2022 and this is expected to rise to 296MW by 2030. Listed below are the five largest energy storage projects by capacity in Canada, according to GlobalData's power database.

Can energy storage technologies be used in Canada?

While energy storage technologies are still at a relatively early stage of deployment in Canada, many energy storage technologies are either already in operation or in development. The electricity produced by wind energy and solar energy can be converted and stored through various means:

Why is Canada a leader in energy storage technology?

In this global context, Canada is well-placed to be a leader in the development and deployment of energy storage technologies that will drive the future of the energy sector. Canada has an abundance of natural resources, a clean electricity grid, and an established innovation ecosystem for energy.

How much energy storage does Canada need?

A report commissioned by Energy Storage Canada in 2022 estimated a minimum of 8-12 GWs of short-duration (6 hours or less) energy storage would be necessary just for Canada to meet its net-zero targets for 2035.

What is the fastest growing energy storage technology in Canada?

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed to be commissioned by 2030 are battery storage, with two CAES and two PHS projects also proposed.
