Cape town pumped hydro energy storage project

Overview

The Palmiet Pumped Storage Scheme consists of two 200 megawatts (270,000 hp) turbine units located 2 kilometres (1.2 mi) upstream of the Kogelberg Dam on the Palmiet River near Cape Town, South Africa. [2] Is pumped hydroelectric energy storage a good investment in South Africa?

Tower in upper basin of a pumped hydroelectric energy storage dam. Image Source: Guenterm1©123RF The development of a major pumped hydro storage project in South Africa has received a major financial boost as the country looks to increase its renewable energy output.

How is water pumped in Cape Town?

Water is pumped from the Thukela River, over the Drakensberg escarpment into the Wilge River, a tributary of the Vaal. The scheme was commissioned in 1982 and has a generating capability of 1 000MW. The Palmiet Pumped Storage Scheme transfers water from the Palmiet River catchment into the Steenbras Dam to supplement Cape Town's water supply.

How much will Cape Town invest in the Steenbras hydro pumped storage scheme?

The City of Cape Town is investing another R1.2 billion into the Steenbras Hydro Pumped Storage Scheme. The city's Building Hope Budget for 2023/24 proposes an investment of approximately R1.2 billion over the next nine years on the maintenance and expansion of the Steenbras hydro plant.

Which city in South Africa has a pumped hydroelectric scheme?

Cape Town is the only metropolitan municipality in South Africa to own and operate a large pumped hydroelectric scheme. Subscribe to improve your user experience. Already a subscriber?

.

How many MW does the Palmiet pumped storage scheme generate?

The scheme was commissioned in 1982 and has a generating capability of 1 000MW. The Palmiet Pumped Storage Scheme transfers water from the Palmiet River catchment into the Steenbras Dam to supplement Cape Town's water supply. The power station can generate 400MW during peak demand periods and began commercial operation in 1988.

What is a pumped-storage hydroelectricity plant?

The pumped-storage hydroelectricity plant is capable of responding to a surge in peak power demand in minutes. At night, excess power on the grid generated by conventional coal and nuclear plants is used to pump water to the upper Rockview Dam overlooking Gordon's Bay. It is regarded [by whom?

] as a forerunner in environmental engineering.

Cape town pumped hydro energy storage project

Pumped Storage Hydropower

Pumped storage hydro - "the World's Water Battery" Pumped storage hydropower (PSH) currently accounts for over 90% of storage capacity and stored energy in grid scale ...

Central de Bombagem Hídrica de Santiago ...

O Projecto Santiago Pumped Storage, que vai ficar localizado em Chã Gonçalves, no concelho da Ribeira Grande de Santiago e vai custar cerca de 60 milhões de euros, promete aumentar significativamente a capacidade ...

Eskom hydro energy plant among infrastructure ...

Also, Eskom's proposal to build a Tubatse Pumped Hydro Storage project with a generation capacity of 1.5GW received the green light from the Department of Mineral Resources and Energy in 2022.

PSP_ING , Energias Renováveis Cabo Verde

The National Directorate for Industry, Commerce and Energy (DNICE) of the Government of the Republic of Cabo Verde intends to prequalify Applicants for Design and Build of the Santiago
