# **Citizen 82s0 movement energy storage**

## Overview

---

Miyota claims that the caliber 8250 offers accuracy of  $-20 \sim +40$  seconds per day. This is measured within 10-60 minutes from a full wind via the crown. To fully wind the movement, turn the crown 40 times. The.

What is a citizen 8200 watch movement?

The Citizen 8200 watch movement is a ball-bearing rotor automatic movement with various functions. It features a sweep second hand, a day function with quickset option and two languages, a quickset date function, shock protection, automatic winding, and a calendar function. This movement was used from 1974 onwards.

What functions does the citizen 8200 have?

The Citizen 8200 features the following functions: OSC. WGT. (17 JL.) OSC. WGT. (21 JL.) All watch database content © EmmyWatch LLC. Unauthorized redistribution of content is strictly prohibited.

How do you wind a caliber 82s0?

To fully wind the movement, turn the crown 40 times. The winding direction of the rotor is counterclockwise. The caliber 8250 has the following layout: The caliber 82S5 and 82S7 are based on the same movement, but the caliber 82S5 has small seconds instead of central seconds.
