Overview

China's National Energy Administration (NEA) has released the China New Energy Storage Development Report 2025, marking the first official and comprehensive government report dedicated to the country's rapidly advancing new energy storage (NES) sector. The report, jointly prepared by the NEA's.

China's National Energy Administration (NEA) has released the China New Energy Storage Development Report 2025, marking the first official and comprehensive government report dedicated to the country's rapidly advancing new energy storage (NES) sector. The report, jointly prepared by the NEA's.

According to CNESA DataLink's Global Energy Storage Database, as of the end of September 2024, the cumulative installed capacity of operational energy storage projects in China reached 111.49 GW. This includes pumped hydro storage, molten salt thermal storage, and other non-hydro storage.

根据CNESA数据库显示，截至2024年9月底，中国已投运的新能源储能项目累计装机容量达到111.49吉瓦。这其中包括抽水蓄能、熔盐储能以及其他非水电储能。CNESA数据库显示，截至2024年9月底，中国已投运的新能源储能项目累计装机容量达到111.49吉瓦。这其中包括抽水蓄能、熔盐储能以及其他非水电储能。

The CNESA White Paper 2024 represents a comprehensive analysis of the current energy storage landscape and future projections. This authoritative document provides detailed insights into market trends, technological advancements, and regulatory frameworks shaping the energy storage industry. The.

Chen Haisheng, Chairman of the China Energy Storage Alliance and Director/Researcher at the Institute of Engineering Thermophysics, Chinese Academy of Sciences, provided a comprehensive summary of the development of new energy storage industries in 2024 and offered insights into the trends for.

China's installed energy storage capacity reached 164 GW by June 2025, according to the China Energy Storage Alliance (CNESA). More than 100 GW came from new energy storage excluding pumped hydro, driven by accelerating deployments and market shifts. From ESS News China's new energy storage market.

According to the China Energy Storage Alliance (CNESA), the nation's fleet of operational energy storage projects reached 103.3 GW by the end of June 2024. This reflects a 47% year-on-year jump and a 20% increase since the end of 2023. On August 25, CNESA held its 2024 Mid-Year China Energy Storage.
