

**JH Solar**

# **Disassembly of the peneng home battery**

## Overview

---

How do you disassemble a battery?

To disassemble a battery, you'll need the right tools. Here's a quick list to get you started: – Screwdriver set (preferably with a couple of tiny screwdrivers for smaller screws) – Pliers – Safety glasses – Gloves – Multimeter (if you want to test the battery's voltage) – A container for any loose parts.

Can all batteries be disassembled?

No, not all batteries can be disassembled. Some batteries, like sealed lead-acid batteries, are not designed to be taken apart by the user. Additionally, some types of batteries, such as lithium-ion batteries, require special precautions due to their volatile nature and should only be disassembled by professionals.

How do you dispose of a battery?

Place them in a container that is specifically designed for battery disposal and consult your local recycling facilities for instructions on how to safely dispose of them. Remember, improper disposal of batteries can be harmful to the environment and may even violate local regulations.
