Does silan micro have energy storage business

ESS

Overview

Silan Microelectronics (Silan; : 赛兰微电子; : Shì Lán Wéi Diànzǐ) is a Chinese headquartered in . The company focuses on the design of (IC) chip and the manufacturing of semiconductor -related products. It is one of the largest (IDM) in China.

Why is Silan micro scaling up its sic production capacity?

In response to surging demand from automotive, renewable energy, computing, and telecommunications sectors, Silan Micro is scaling up its SiC production capacity. ● 6-inch SiC chip production line: Currently producing 9,000 wafers per month.

Why should you buy Silan micro?

By continuously expanding its automotive- and industrial-grade semiconductor offerings, Silan Micro is well-positioned for sustained revenue growth and improved profitability. The company is poised to strengthen its presence in the global power semiconductor market, contributing significantly to China's push for semiconductor self-sufficiency.

Does Silan Micro have a global presence?

Over the past few years, Silan Micro has steadily expanded its international presence. From 2020 to 2022, the company's MOSFET, IGBT, and IPM intelligent power module market shares consistently ranked within the global top 10.

Is Silan microelectronics a leading semiconductor company in China?

Notably, Silan Microelectronics (600460.SH) ranked 10th globally, capturing a 2.6% market share, making it the only Chinese company in the top 10. This achievement highlights Silan Micro's growing strength in power semiconductors and underscores China's rapid rise in the global semiconductor industry. Expanding Market Presence and Revenue Growth.

Is Silan micro an IDM company?

According to the financial report, after more than 20 years of development, Silan Micro has become a comprehensive semiconductor product company with the "integrated design and manufacturing" (IDM) model as its main business model. As an IDM company, the company has the characteristics of relatively heavy assets.

What did Silan micro do in 2024?

In 2024, Silan Micro continued to launch highly competitive products and expanded its footprint in high-barrier markets, including household appliances, telecommunications, industrial applications, renewable energy, and automotive sectors. The company has benefited significantly from the rapid growth of the EV and renewable energy industries.

Does silan micro have energy storage business

Hangzhou Silan Microelectronics Co., Ltd.

The 5th generation IGBT products from Silan provide a total solution of faster, smaller and more reliable for new energy vehicles . At the same time, Silan provides 1200V SiC MOS devices ...

Why is Silan Micro so fierce?

Power devices and integrated circuits are the two core businesses of Silan Micro . In recent years, the proportions of the two businesses have remained above 80%.

Hangzhou Silan fast charging products have what , Weyland

In addition, Silan has also introduced a two-in-one travel charger/mobile power supply with power distribution function to meet the portable demand of consumers who only ...

Silan Micro: Accelerated release of power IDM capacity, new energy

Silan Micro: Accelerated release of power IDM capacity, new energy drive product upgrade 01.
