Eastern europe gas storage

Overview

Which EU member states have the largest gas storage capacity?

The chart shows the gas storage capacity for each EU member state as at 24 June 2025. The chart shows the gas storage capacity, the amount of gas in storage and the filling level for each EU member state as at 12 February 2025. Germany, France, Italy and the Netherlands are the countries with the largest storage capacities.

Does Russia supply natural gas in Eastern Europe?

In Eastern Europe, only Ukraine and Romania produce significant amounts of natural gas, and most countries in the region are wholly dependent on imports for the gas they consume. Russia's role in supplying natural gas was particularly pronounced in both EU and non-EU countries in Eastern Europe.

Will EU countries relax gas storage targets?

European Union countries will on Thursday discuss demands from some governments to relax the bloc's gas storage targets, EU sources close to the matter told Reuters, as concerns mount over the cost of refilling Europe's gas caverns this year.

Will Eastern Europe continue to diversify gas supplies?

There is no guarantee that Eastern Europe and the rest of the continent, or major partners such as Turkey, will remain as unified in the drive to diversify gas supplies as they have been for the past three years.

Where does gas flow from the EU?

Gas flows from the EU Members States to Serbia, Russia, Ukraine, Moldova, Switzerland, and North Macedonia. The platform is provided for informative and indicative purposes only. Data aggregation solutions (i.e., graphs, maps illustrations, legends and summaries) are developed by ENTSOG in coordination with ENTSOG members.

Why is natural gas important in Eastern Europe?

Since the 1970s, natural gas has been Eastern Europe's most politically sensitive commodity—and has often been the turning point of the region's geopolitics. As pipelines proliferated across Eastern Europe, Russian natural gas supplied not only the Warsaw Pact countries but also Yugoslavia as it flirted between the Western and Eastern blocs.

Eastern europe gas storage

Gas and Energy Security in Germany and Central ...

Russia's weaponization of gas supplies caused a shock to the energy security of Central and Eastern Europe in 2022. Countries responded by increasing alternative energy supplies and developing new ...

Why Europe's Gas Storage Has Become More of a ...

Europe's stockpiles of natural gas have been a closely watched metric since the invasion of Ukraine triggered a dramatic downturn in Russian supply to the region.

Bulgarian gas storage would improve energy

Bulgaria's strategic location makes it a great hub for passing along natural gas to the rest of Europe. In case of trouble and limited supply it would also be the first to pay a ...

European Natural Gas Inventories

Gas Infrastructure Europe (GIE) provides daily updates on European natural gas inventories for 18 nations. European storage numbers are important for the US market as these nations are ...

Energy Storage , Uniper

As one of Europe's largest gas storage operators, Uniper Energy Storage ensures that energy is available flexibly whenever it is needed. As an independent company, we offer access to 9 underground gas storage ...
