Energy storage container camping house

Overview

What is a container home?

The container home technology is designed similar to technologies used in camping vehicles and boats. The energy and power supply is ensured through solar panels on the slide-out, with a maximum hourly output of 1.8 kW. A power bank with a 12 kWh battery storage capacity is used for energy storage.

What are camping storage containers made of?

Camping Storage Containers are made up of HDPE, a thermoplastic polymer made up of petroleum. HDPE plastic is known for its high impact resistance and melting temperature and has excellent tensile strength and a big strength-to-density ratio.

How does a container home work?

The 220V power supply of the container home is designed to meet the needs of a European hotel suite. The heating and hot water supply is ensured by a Truma heating system, which can run on either electricity or gas. In addition, hot water supply for the bathroom is supported by a gas-powered boiler.

What is a hermitainer container home?

This container home rests on a semitrailer by Pielton, with three axles and disk brakes, and is towed by a Mercedes Actros truck. In this configuration, the HERMITAINER is presented as a mobile home for street transport. The container home can also be placed directly onto the ground or, for example, on a floating platform.
