# Energy storage container news

## Overview

---

How much energy does a 20 ft container system use?

The Chinese manufacturer said its next-gen 20-foot container system packs 40% more energy and has a 40% smaller footprint compared to a standard 5 MWh system. The new product is based on 587Ah battery cells, with an energy density of more than 430 Wh/L. The capacity of a single battery cell stands at 1.87 kWh.

Which energy storage companies have higher capacity cells?

Higher capacity cells were previously released by the likes of Envision (700 Ah featured in its industry-leading 8 MWh, 20-foot BESS container) and Hithium (1175 Ah featured in its latest 6.25MWh BESS with a four hour energy storage configuration).

Which energy storage projects have been approved by state regulators?

Energy Dome and Alliant Energy's 200MWh long-duration energy storage (LDES) project in Wisconsin, US, has been approved by state regulators. The Ministers of Energy and the Environment in Lithuania have approved an additional €37 million (US\$43 million) for an energy storage capex grant scheme, while Trina Storage has secured orders in the country.
