## Overview

---

Is energy storage part of EIT InnoEnergy Master School?

Energy Storage is part of EIT InnoEnergy Master school. It is a two-year Master's programme including compulsory mobility for the students. More information can be found on the program's website [Read about the experience of our student Albert Rehnberg and follow his path!](#).

What is a Master's in energy storage?

Master's Programme in Energy Storage is jointly organized by the School of Engineering and the School of Chemical Engineering. The programme is coordinated by the School of Engineering. Energy storage touches every discipline present at every step of the renewable energy value chain; it is the key to energy sustainability worldwide.

What is student energy?

Student Energy is a global youth-led organization empowering and educating young people to accelerate the sustainable energy transition through a variety of initiatives, including university-based Chapters, a digital Energy System Map, and the largest student-led energy conference in the world.

Why is energy storage important?

Energy storage touches every discipline present at every step of the renewable energy value chain; it is the key to energy sustainability worldwide. Demand is becoming critical for engineers with the specialized yet transversal technical skills as well as the business and entrepreneurial talent to address new challenges, find new solutions.

How do I apply to the InnoEnergy programmes?

If you are interested in applying to the InnoEnergy programmes, follow the link at the bottom of the site to the application page. Master's Programme in Energy Storage is jointly organized by the School of Engineering and the

School of Chemical Engineering. The programme is coordinated by the School of Engineering.
