Energy storage investment promotion policy

Overview

In addition to the risks and barriers affecting all investment, such as macro-economic and political instability, renewable energy investment faces a range of specific risks and challenges. These include:.

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. § 17232 (b) (5)).

Do tax incentives work for energy investment?

While most developed economies use targeted investment promotion policies, many developing countries use generic tax incentives – applicable to investment in any industry – that do not address the specificities of energy investment projects.

Why is DOE investing in energy storage?

The underlying motivation for DOE's strategic investment in energy storage is to ensure that the American people will have access to energy storage innovations that enable resilient, flexible, affordable, and secure energy systems and supply, for everyone, everywhere.

What are the different types of energy storage policy?

Approximately 16 states have adopted some form of energy storage policy, which broadly fall into the following categories: procurement targets, regulatory adaptation, demonstration programs, financial incentives, and consumer protections. Below we give an overview of each of these energy storage policy categories.

What is a storage policy?

All of the states with a storage policy in place have a renewable portfolio

standard or a nonbinding renewable energy goal. Regulatory changes can broaden competitive access to storage such as by updating resource planning requirements or permitting storage through rate proceedings.

Are policy frameworks aimed at promoting investment in the energy transition inadequate?

The Monitor's findings reveal that existing policy frameworks aimed at promoting investment in the energy transition are notably inadequate, especially in poorer nations. Around the world, two-thirds of countries have adopted renewable energy policies.
