## Overview

---

How can energy storage help Thailand?

She said many energy storage technologies exist nowadays, such as pumped hydro, compressed air, flywheel, batteries, solar fuels and hydrogen. She also pointed out that energy storage can help Thailand in various aspects, such as electricity generation, renewable energy, system operation, and energy transmission and distribution.

Can Tesla Powerwall help Thailand's energy transition?

Tesla Powerwall also comes with an application that allows users to check and adjust energy storage in their houses. "This technology can meet the change in people's lifestyle effectively," Sumrit added. Energy storage is important for Thailand's energy transition, a senior researcher said at a seminar on Thursday.

How much power does Thailand produce?

As of May 2019, Thailand (including imports) had installed generation capacity of 42,835 MW, of which 14,566 MW (34%) was accounted for by EGAT power plants; 14,949 MW (35%) by independent power producers; 9,443 MW (22%) by small producers; and 3,878 MW (9%) by foreign producers of imported power. Energy Policy and Planning Office. 2019.

Which energy storage technologies exist today?

The seminar was a part of the event "Solar+Storage Asia 2022" organised by MICE (meetings, incentives, conferences, exhibitions) organiser GAT International. She said many energy storage technologies exist nowadays, such as pumped hydro, compressed air, flywheel, batteries, solar fuels and hydrogen.

Does Thailand offer private sector participation in renewable electricity generation?

The Government of Thailand has opened access for private sector participation in the renewable electricity generation business through its programs for small and very small power producers.

Who buys electricity in Thailand?

It is the principal purchaser of electricity in Thailand and sells all the power it generates or purchases (from private power producers and neighboring countries) to two state-owned enterprises: the Metropolitan Electricity Authority (MEA) and the Provincial Electricity Authority (PEA).
