Entering the energy storage industry without experience

Overview

Is energy storage a permanent solution?

Despite the uncertainty of future economics, the trend is clear: energy storage is here to stay. The high capital expenditure, long storage system lifespans, and uncertain policy changes make costs uncertain, but the still-falling costs and exponential increase in capacity demonstrate this.

What makes field a great energy storage company?

The energy storage industry is no exception. At Field, they are the glue that holds us together - whether that's by bringing new talent into the business, negotiating contracts or ensuring we have a strong balance sheet. They're absolutely essential to the Field business, enabling us to do the work we do.

What makes the energy storage industry so interesting?

The energy storage industry is still fairly young compared to others like wind or solar. This means it's rapidly growing, changing and innovating (part of what makes working in the industry so interesting).

Why do energy storage companies need a strong finance team?

Regardless of which sector they're working in, businesses need strong finance, legal and people teams. The energy storage industry is no exception. At Field, they are the glue that holds us together - whether that's by bringing new talent into the business, negotiating contracts or ensuring we have a strong balance sheet.

What role does technology play in energy storage?

Technology has a very important role to play in energy storage and has been instrumental in getting the industry to where it is now. That said, we're still learning and solving complex problems each day. This means the industry needs software developers and data scientists, along with machine learning and optimisation experts.

Why is the energy industry growing so fast?

The industry is expanding rapidly due to global commitments to reduce carbon emissions and adopt clean energy solutions. From solar and wind power to energy storage and green hydrogen, the sector offers diverse roles in engineering, project management, sales, and beyond.
