Find water storage projects

Overview

WASHINGTON — The Department of the Interior today announced the availability of up to \$43.5 million from the Bipartisan Infrastructure Law for small water storage projects that will create new sources of water for communities in the West. Surface water and groundwater storage are essential tools in.

WASHINGTON — The Department of the Interior today announced the availability of up to \$43.5 million from the Bipartisan Infrastructure Law for small water storage projects that will create new sources of water for communities in the West. Surface water and groundwater storage are essential tools in.

The California Water Commission is administering the Water Storage Investment Program (WSIP) to fund the public benefits associated with these projects. WSIP Take a visual tour of the Water Storage Investment Program In July 2018, the Commission made maximum conditional eligibility determinations.

The U.S. Department of the Interior, through the Bureau of Reclamation (Reclamation) administers a competitive grant program for small water storage and groundwater storage projects, authorized by Section 40903 of the Infrastructure Investments and Jobs Act (2021), Public Law 117-58. Reclamation.

The Bureau of Reclamation's Small Storage Program was authorized by sections 40901 (1) and 40903 of the Infrastructure Investment and Jobs Act (IIJA) to promote Federal assistance to enhance water storage opportunities for future generations in support of the Department of the Interior's. What is a small storage project?

The Bipartisan Infrastructure Law authorized the Small Storage Program which provides funding for surface and groundwater storage projects between 200 and 30,000 acre-feet. Projects must also increase the storage or move water to or from the storage project.

What are surface water and groundwater storage projects?

Surface water and groundwater storage are essential tools in stretching the limited water supplies caused by a changing climate. These projects will provide communities with new sources of water and increase water management flexibility, making water supply more reliable.

How do I get information about the small storage program?

For more information regarding the Small Storage Program, please contact the Small Storage Program Team at bor-sha-smallstorage@usbr.gov. You may complete this form to receive notifications about the Small Storage Program from the Bureau of Reclamation.

How many acre-feet does a small storage project need?

In accordance with the BIL, as amended by P.L. 117-328, projects must have a water storage capacity of not less than 200 acre-feet and not more than 30,000 acre-feet. Awards made under the Small Storage Program's second funding opportunity were announced on March 27, 2024 to six small storage projects located in California and Utah.

What is Sites Reservoir?

The proposal is widely supported by local community leaders, residents, as well as state water managers and water agencies from the Bay Area to Southern California. Sites Reservoir is a water savings account for dry years.

How is Sites Reservoir funded?

Sites Reservoir is funded by 100% public dollars from local, state, and federal sources. The constituents served by the public agencies funding the project will directly benefit from increased water supply reliability, as well as the reservoir's environmental and recreational benefits. © 2025 Sites Reservoir.
