

**JH Solar**

# **Finland develops new energy storage industry**

## Overview

---

What is the future of energy storage in Finland?

Reserve markets are currently driving the demand for energy storage systems. Legislative changes have improved prospects for some energy storages. Mainly battery storage and thermal energy storages have been deployed so far. The share of renewable energy sources is growing rapidly in Finland.

Is this Finland's largest battery energy storage system?

Swedish flexible assets developer and optimizer Ingrid Capacity has joined hands with SEB Nordic Energy's portfolio company Locus Energy to develop what is claimed to be Finland's largest and one of the Nordics' largest battery energy storage systems (BESS). The 70 MW/140 MWh BESS project will be located in Nivala, northern Finland.

Which energy storage technologies are being commissioned in Finland?

Currently, utility-scale energy storage technologies that have been commissioned in Finland are limited to BESS (lithium-ion batteries) and TES, mainly TTES and Cavern Thermal Energy Storages (CTES) connected to DH systems.

Is energy storage a viable solution for the Finnish energy system?

This development forebodes a significant transition in the Finnish energy system, requiring new flexibility mechanisms to cope with this large share of generation from variable renewable energy sources. Energy storage is one solution that can provide this flexibility and is therefore expected to grow.

Is energy storage the future of wind power generation in Finland?

Wind power generation is estimated to grow substantially in the future in Finland. Energy storage may provide the flexibility needed in the energy transition. Reserve markets are currently driving the demand for energy

storage systems. Legislative changes have improved prospects for some energy storages.

Is the energy system still working in Finland?

However, the energy system is still producing electricity to the national grid and DH to the Lempäälä area, while the BESSs participate in Fingrid's market for balancing the grid . Like the energy storage market, legislation related to energy storage is still developing in Finland.

## Finland develops new energy storage industry

---

### Technologies for storing electricity in medium

This report provides an initial insight into various energy storage technologies, continuing with an in-depth techno-economic analysis of the most suitable technologies for Finnish conditions, ...

### Glennmont, Ilmatar and Alfen to develop 30MW BESS in Finland

The BESS is being built near the operational Piiparinmäki onshore wind farm. Image: Glennmont Partners. Construction has begun on a 30MW battery energy storage ...

### Finland steadily promotes new energy storage Wha

Reserve markets are currently driving the demand for energy storage systems. Legislative changes have improved prospects for some energy storages. Mainly battery storage and ...

### Finland activates world's largest sand battery to store renewable ...

Finland has activated the world's largest sand battery in Pornainen, storing excess renewable

energy as heat to power an entire town's heating needs. The system cuts ...

## Finland to lead the way in developing energy storage

For Finnish trade and industry, a new energy system and its associated technologies could provide a significant opportunity to succeed in the global market. The Neo-Carbon Energy ...

## Energy in Finland

Finland's per capita energy consumption is notably high, driven by its heavy industry sector and significant heating requirements due to its cold climate. In 2021, the industrial sector was the ...

## FINAL REPORT Batteries from Finland

2. Objectives and methodology of this study This study is part of Business Finland Batteries from Finland activation program which aims at speeding up development of national battery ...

## Finland Aims to Lead in Development of Storage for PV and Wind

"Solar and wind energy can provide major opportunities to create new jobs and export products for Finland. The purpose of the project is to develop an energy system based ...

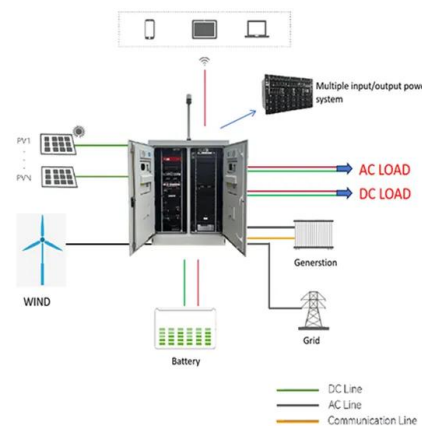

## RRF BATTERY INDUSTRY 2023

The supplementary funding call published on March 15th is intended for: o introduction of new technology related to renewable energy production or energy efficiency in the battery industry. ...

## Home , Biosolar

For municipalities Our solutions facilitate reaching carbon neutrality and Finland's energy self-sufficiency goals. Investing in renewable energy generates regional employment and unlocks new business prospects, ...

## TES and CPC Finland to develop 500MW e-NG Project at the ...

Tree Energy Solutions and CPC Finland OY have formed a strategic partnership through the establishment of LUOTO ENERGIA OY, a joint company focused on developing a ...

## A review of the current status of energy storage in Finland and ...

This study reviews the status and prospects for energy storage activities in Finland. The adequacy of the reserve market products and balancing capacity in the Finnish ...

## Å Energi acquires a majority stake in a large-scale energy storage ...

About Å Energi Å Energi is Norway's biggest renewable energy group, with operations throughout the value chain from electricity generation to end users. The group's ...

## Finnish-made 10 MWh BESS sets speed record: ...

A 5 MVA/10 MWh BESS in Kuhmoinen, Finland, has begun commercial operations and changed ownership, marking a big milestone for domestic manufacturing in the Nordic energy storage sector. The project, ...

## Yaskawa invests in energy storage company, Teraloop

About Teraloop Teraloop Ltd, based in Helsinki, Finland, develops breakthrough technology for large-scale kinetic energy storage used in grid and utility applications. Founded ...

## Batteries from Finland

INTRODUCTION This study is part of Business Finland Batteries from Finland activation project which aims at speeding up development of national battery ecosystem and creating a totally ...

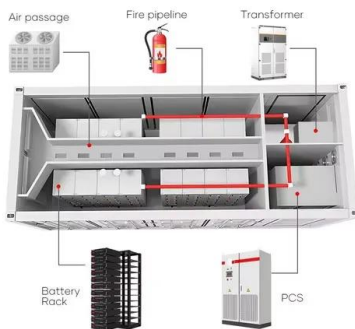

## A review of the current status of energy storage in Finland ...

A review of the current status of energy storage in Finland and future development prospects This is an electronic reprint of the original article. This reprint may differ from the original in ...

## Major Milestone Achieved with New Energy Storage in Finland

Discover how Merus Power's new energy storage facility enhances Finland's electricity grid, promoting sustainability and efficiency in the energy sector.

Support any customization

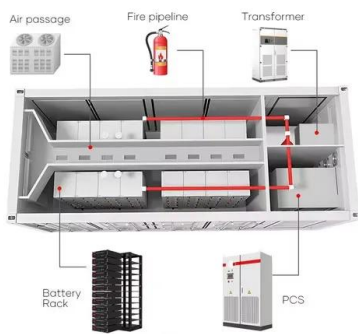

## Finland develops energy storage business A new Business ...

The group proposes that demand flexibility, the provision of new services to customers as well as energy storage should be treated as competitive business activities (for energy storage, see ...

## Spotlight on Finland: Energy storage sector set to double

Finland's energy storage market is expanding, thanks largely to increasing renewable energy sources, plus regulatory adaptation being made by Fingrid, the transmission ...

## Energy Stored in Sand - Polar Night Energy Builds ...

Developing a thermal energy storage system with a new feature enabling stored heat to be converted back into electricity Founded in 2018  
 Turnover 2024: EUR129,300 Employees: 21  
 Locations: Tampere, ...

## Finland develops leading energy storage project

The Power-to-X plant represents a leading Finnish sustainable energy transition project. It will have a capacity of 200 MW and will convert green electricity into hydrogen and sustainable ...

## EUROPE and Energy Storage are the key FINLAND

Transmission Grids, Capital Cost and Energy Storage are the key action priorities that stand out in Finland's energy horizon, according to the 2024 World Energy Issues Monitor survey results. ...

## Finland's energy storage industry development policy

The IEA takes a positive view of Finland's energy policy and the achievements of recent years, which include significant construction of wind power, development of heat storage, deployment ...

## Executive summary - Finland 2023 - Analysis

There is also a push for the development, commercialisation and cost reduction of new and emerging energy technologies to drive energy transition in hard-to-abate sectors and end uses, ...

## Top 11 Green Energy startups in Finland (August 2025)

Funding: EUR35.5M Cactus develops distributed energy storage systems based on recycled EV batteries. The energy storage units are made from re-used Tesla EV batteries, ...

## World's first large-scale 'sand battery' goes online ...

The first commercial sand based thermal energy storage system in the world has started operating in Finland, developed by Polar Night Energy.

## Merus Power built its own energy storage facility in Lempäälä, Finland

The energy storage facility creates possibilities for Merus Power to develop new technologies and test them in a bricks-and-mortar-establishment. Significant investment in ...

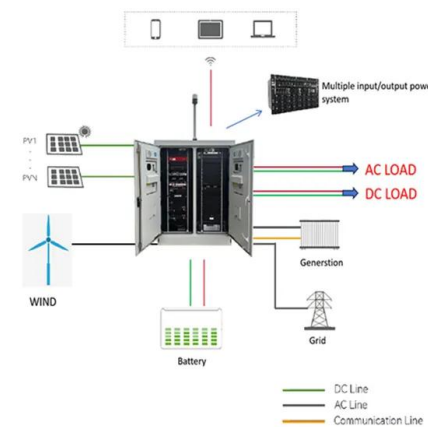

## FINLAND'S NEW ERA OF HOME ENERGY STORAGE

make Finland's cities more sustainable? Heating Finland's cities is becoming more sustainable thanks to sand. Finnish startup Polar Night Energy has developed a battery that uses sand to ...

## Finland's Giant Battery Storage Project Set to Transform Energy ...

A groundbreaking renewable energy initiative is about to take shape in Finland, as a massive battery storage project is set to commence construction soon. This ambitious endeavor aims to ...

## Helsinki's New Energy Storage Industry: Powering the Future

...

What's fueling this growth? For starters, Finland's obsession with efficiency (ever tried their public transport system?) pairs perfectly with the energy storage industry's need for ...

## ENERGY STORAGE

Energy and climate policies that support sustainable development are generating a need for new energy storage solutions. Key drivers in this field include the electrification of transport, the ...

### **Finland to lead the way in developing the storage of solar and wind energy**

"Solar and wind energy can provide major opportunities to create new jobs and export products for Finland. The purpose of the project is to develop an energy system based ...
