

JH Solar

Finnish distributed energy storage service company

Overview

The Finnish government has granted Elisa €3.9 million (\$4.2m) in funding for the rollout of its Distributed Energy Storage (DES) solution across its network. According to the operator, it will create Europe's largest distributed virtual power plant. Can des connect base station batteries to Finnish electricity reserve market?

HELSINKI, June 5, 2025 /PRNewswire/ -- DNA Tower Finland, a Telenor Towers company, has successfully connected base station batteries to the Finnish electricity reserve market using Elisa Industriq's AI-based Distributed Energy Storage (DES) solution.

What is Elisa's distributed energy storage solution?

Elisa to accelerate Distributed Energy Storage solution - Europe's largest distributed virtual power plant in the making in Finland. If you'd like to hear more about Elisa's Distributed Energy Storage solution, leave your contact details here and someone from the team will be in touch shortly.

Why is distributed energy storage important?

"It is critical for society that we have an energy supply that is affordable, secure and sustainable, and the potential for distributed energy storage of telecom networks to contribute to this is huge," said Jukka-Pekka Salmenkaita, Vice President of AI and Special Projects at Elisa.
