Fire energy storage door closer

Overview

How does a door closer work?

Lg. Ht. These closers include a door holder, which keeps doors open with an electromagnet. When activated by a fire alarm, the magnet shuts off and releases the door. Hardwire these closers directly into your fire alarm system. Designed for frequently used doors, they last longer than standard door closers.

Why should you use a fire door closing system?

Fires cause thousands of deaths each year and billions of dollars in property damage. Our fire solutions are engineered to help save property, and more importantly, lives. Our advanced fire door closing systems are activated electronically to quickly contain fire and smoke migration.

Why should you choose Abloy® fire door closing systems?

security in the event of fire. ABLOY fire door closing systems are composed of reliable and compatible components that enable building up a safe, individual solution for each application. ABLOY® fire door closing systems are CE certified. Our products are available with wide variety of standard col.

How do fire doors close?

ON OF FIRE DOOR CLOSING SYSTEMS If fire doors are held open they must close in the break out of a fire to retain smoke and flames and prevent the fire from spreading throughout the building. The smoke detector (1) reacts to smoke and activates the alarm to the hold open device of the door (2). The door closer (3) closes and latches.

How do reversible door closers work?

When activated by a fire alarm, the magnet shuts off and releases the door. Hardwire these closers directly into your fire alarm system. Designed for frequently used doors, they last longer than standard door closers. They are

reversible for right or left door-swing directions.

Are fire doors effective if they close?

But doors are only effective if they close - the most integral part of a fire system is how the system activates to close doors when fire or smoke is detected. Cookson's fire doors, rolling fire shutters and elevator smoke doors have the features that truly benefit the owner long after the installation is complete.
