# Get the energy storage device to start

## Overview

---

How do I activate all the energy storage terminals?

So, let's see what steps you need to take to activate all the terminals:  
Research Terminal #1: Take the first Energy Storage Device and move forward and to the right. You'll have practically no other options, so you'll know where to go right away.

How do I find the energy device?

You must first pick up the Energy Device on the left, which is hidden behind a Geode. As soon as you pick up the Energy Device, the timer will start, and you need to find the corresponding terminal within the time limit. Avoid the floating circles as they will reduce the timer by 30 seconds. Follow this exact path to find the terminal.

What is ESS Energy Storage?

ESS is a leading provider of long-duration energy storage solutions ideally suited for C&I, utility, microgrid and off-grid applications. Using food-grade, earth-abundant elements like iron, salt, and water for the electrolyte, its innovative iron flow battery system is changing how the industry deploys energy storage.
