What is a Honda fuel cell power generator?

**Honda Fuel Cell Power Generator** The Honda Fuel Cell Power Generator, scheduled for mass production in 2026, is a stationary power storage system capable of supplying hydrogen-derived, clean electricity to large facilities such as factories and offices. It utilizes the fuel cell also being used for the Honda CR-V e:FCEV fuel cell vehicle.

Can Honda supply electricity stored in MPP to the power grid?

Moreover, further down the road, Honda is considering the possibility of supplying electricity stored in MPP to the power grid in case of a power shortage by connecting Honda Mobile Power Pack Exchanger e: to the power grid.

What is Honda next generation fuel cell module?

The Honda Next Generation Fuel Cell Module unveiled today is being independently developed by Honda as a successor to the current model Honda jointly developed with General Motors (GM).

What is Honda Mobile Power Pack E (MPP)?

Anticipating such a trend, Honda created Honda Mobile Power Pack e: (MPP), an easy-to-use swappable battery pack, to address the key issues facing electric mobility products, namely the long charging time, inadequate range and high battery cost.

What is Honda Mobile Power Pack exchanger E?

Honda Mobile Power Pack Exchanger e: is a battery swapping station, currently under development, which can charge multiple MPPs simultaneously. Considering the secondary use of MPP which becomes unsuitable for the use of mobility products due to degradation.

What is Honda MPP battery pack?

The MPP is a reliable battery pack Honda developed by fully applying such development know-how so that our customers can use it with complete peace of mind. The compact MPP is filled with the wisdom and ingenuity of Honda engineers who want to enable people to use electricity whenever and wherever they need it. 1. Tough structure
