# Household gas storage tank

## Overview

---

It's not advisable to store gasoline in just any container. Gasoline must be stored in firmly sealed aluminum, high-carbon steel, hard plastic, or fiberglass storage tanks labeled "gasoline." For long-term storage, diesel fuel tanks are the best bet! According to the Federal Government's official guidelines, 10-50.

If you need to store gasoline at your home for an emergency generator, lawnmower, or any other purpose, you need to follow certain safety rules. Fire codes typically restrict gas storage at residential complexes to no more than 25 gallons. Ensure to store gasoline in.

Like any other compound, gasoline too, has a shelf life. Once it loses its combustion ability, it tends to damage the components of the fuel.
