Is the vat refundable for energy storage

Overview

Are solar and energy storage installations subject to VAT?

All solar and energy storage installations, including maintenance to existing sites, should be subject to 0% VAT. This should include residential energy storage when installed as a standalone measure.

Can I get VAT relief for energy storage devices?

In this announcement, we capture the key factors that will allow you to get VAT Relief for energy storage devices and specifically batteries. The relief applies to the services of installing energy-saving materials in residential accommodation and charitable buildings.

Are energy saving materials subject to VAT?

“Under current rules, the fact that energy saving materials are frequently installed at the same time as wider heating measures, such as full central heating systems, prevents the reduced rate from being applied at all, meaning they are subject to 20 per cent VAT.”

Should VAT be changed for residential solar?

The change in VAT should contribute to ensuring affordable energy for the UK by incentivising greater deployment of residential solar PV, solar thermal, and other energy efficiency measures. There is already a strong financial case for residential solar.

What is the VAT rate on solar?

VAT on a range of domestic energy efficiency and renewable energy installations, including solar, is now 0% in Great Britain. This is a reduction from the previous rate of between 5% and 20%. Eligible installations are those included on the Government’s list of Energy Saving Measures (ESMs).

How do I get VAT relief on energy saving materials?

Previously, to get VAT relief on Energy Saving Materials, a household had to meet eligibility criteria (i.e., be on certain benefits, etc.) or go through a complicated '60% test'.
