Jinpan technology wins bid for energy storage project

Overview

What will Jinpan technology do during the 14th five-year plan?

During the 14th Five-Year Plan period, Jinpan Technology will focus on new energy and digital industrialization as the strategic core, continuously consolidate the company's dominant position in the field of new energy, focus on energy storage series products, and deploy nationwide energy storage digital factories.

Why did Jinpan technology sign a digital rural construction agreement?

On November 10, 2021, Jinpan Technology signed the donation agreement of the digital rural construction project of Muli County, which was the first action of the Jinpan Technology to respond to the national call for rural revitalization after the targeted poverty alleviation activities of previous years.

What is digital energy management system of Jinpan smart technology Haikou base?

At this stage, the Digital Energy Management system of Jinpan Smart Technology Haikou Base mainly covers the production workshop, distribution room and office area of the digital factory.

What is Jinpan technology?

Jinpan Technology will unleash the vitality of high-quality development and the resilience to resist risks, join hands with stakeholders to build a "community of corporate destiny", create more comprehensive economic, social and environmental value, and contribute to the harmonious coexistence and sustainable development of mankind and the earth.

Does Jinpan technology use a lot of water?

Manufacturing enterprises have been consuming large amounts of water. According to statistics, the industrial water consumption of Jinpan Technology is up to 300,000 tons every year, which not only increases the operating cost

of the company, but also causes a huge waste of resources.

How does Jinpan work?

Each team is equipped with appropriate labor protection products as required, and uses them correctly in strict accordance with the requirements to achieve effective protection. Jinpan technology actively uses digital means to eliminate potential safety hazards, thus ensuring safety production.
