# **Kishida fumio energy storage**

## Overview

---

Japan's FIT scheme has contributed to the rapid deployment of solar and onshore wind generation capacity. But as the scheme provides a fixed price for the electricity produced, there.

In August, Japanese prime minister Fumio Kishida called for an acceleration in the introduction of stationary battery storage along with a power grid.

With countries around the world pushing to accelerate their renewable deployments, it is more important than ever to maximize solar electricity generation.
