

JH Solar

Large-scale sodium-ion battery energy storage company

Overview

Sodium battery companies specialize in developing energy storage systems using sodium-ion technology as a cost-effective, sustainable alternative to lithium-ion batteries. Key players include Faradion (UK), Tiamat (France), HiNa Battery Technology (China), Natron Energy (US), and Altris AB.

Sodium battery companies specialize in developing energy storage systems using sodium-ion technology as a cost-effective, sustainable alternative to lithium-ion batteries. Key players include Faradion (UK), Tiamat (France), HiNa Battery Technology (China), Natron Energy (US), and Altris AB.

China's state-owned power generation enterprise Datang Group said on June 30 that it had connected to the grid a 50 MW/100 MWh project in Qianjiang, Hubei Province, making it the world's largest operating sodium-ion battery energy storage system. The project represents the first phase of the Datang.

The Sodium-ion Battery landscape is rapidly evolving as leading companies innovate to meet the growing demand for sustainable energy solutions. This development comes in response to the increasing need for alternatives to traditional Lithium-ion batteries. By 2033, the global Sodium-ion Battery.

The first phase of the world's largest sodium-ion battery energy storage system (BESS), in China, has come online. The first 50MW/100MWh portion of the project in Qianjiang, Hubei province has been completed and put into operation, state-owned media outlet Yicai Global and technology provider HiNa.

With the global push for sustainable energy, sodium-ion batteries are emerging as a cost-effective, safe, and scalable alternative to lithium-ion technology. Leading battery manufacturers are developing next-generation sodium-ion solutions for applications ranging from home energy storage to.

The first part of the world's largest sodium-ion battery energy storage system (BESS) has been launched in China. State media Yicai Global and technology provider HiNa Battery reported last week that the 50MW, 100MWh section of the project in Qianjiang, Hubei province, has been completed and is now. Are

sodium-ion batteries the future of energy storage?

With companies like NextThing Technologies, Faradion, AMTE Power, and Natron Energy leading advancements, sodium-ion technology is set to redefine energy storage. The industry is moving toward scalable, safe, and cost-efficient battery solutions, making sodium-ion batteries a cornerstone of future energy infrastructure.

Who makes sodium ion batteries?

Overview: A UK-based leader in sodium-ion technology, Faradion was the first company to commercialize sodium-ion batteries. Now backed by Reliance Industries, it is scaling up global production. High-energy-density sodium-ion batteries for EVs & grid storage. Stronger safety profile compared to lithium-ion.

What is the first large-scale energy storage system in the world?

The first project of its kind in the world Large-scale energy storage systems using sodium-ion batteries are still rare. In May 2024, the first large-scale project of this type in China was launched in the Guangxi-Zhuang region, with a current capacity of 10 MWh.

What is a sodium battery?

Sodium battery companies specialize in developing energy storage systems using sodium-ion technology as a cost-effective, sustainable alternative to lithium-ion batteries. Key players include Faradion (UK), Tiamat (France), HiNa Battery Technology (China), Natron Energy (US), and Altris AB (Sweden).

What is Datang Hubei sodium ion new energy storage power station?

The project represents the first phase of the Datang Hubei Sodium Ion New Energy Storage Power Station, which consists of 42 battery energy storage containers and 21 sets of boost converters. It uses 185 ampere-hour large-capacity sodium-ion batteries supplied by China's HiNa Battery Technology and is equipped with a 110 kV transformer station.

Are sodium ion batteries a viable alternative to lithium-ion?

With the global push for sustainable energy, sodium-ion batteries are emerging as a cost-effective, safe, and scalable alternative to lithium-ion technology. Leading battery manufacturers are developing next-generation

sodium-ion solutions for applications ranging from home energy storage to grid-scale deployment.

Large-scale sodium-ion battery energy storage company

Grid-Scale Battery Storage: Green Energy's Next ...

If the grid can't bear all the clean energy flowing in at peak periods, it gets curtailed - disconnected and dumped. Grid-scale battery storage could be the answer. Keep enough green electrons in stock for ...

Top 10 sodium ion battery manufacturers in the world

This made it realized the first large-scale application of sodium-ion battery cells in the northern energy storage power station, marking the company's sodium-ion battery cells formally imported into the ...

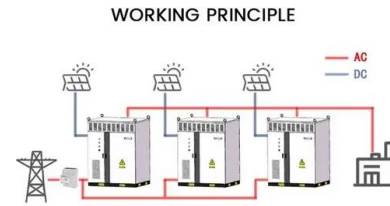

Peak Energy Deploys U.S. Grid-Scale Sodium-Ion Battery System

The world's biggest sodium-ion battery system, which uses phosphate pyrophosphate (NFPP) for its battery chemistry, consists of large containers that store energy ...

Sodium Batteries for Use in Grid-Storage Systems ...

For all of these reasons, it remains unlikely that sodium can completely replace lithium for extremely small batteries. Instead, it can be used

in combination with lithium for PEV and large-scale energy storage ...

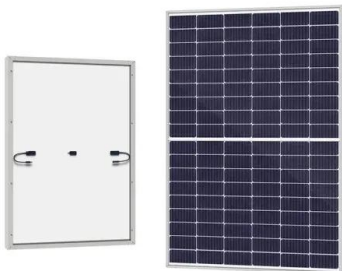

World's largest sodium-ion battery goes into ...

China's state-owned power generation enterprise Datang Group said on June 30 that it had connected to the grid a 50 MW/100 MWh project in Qianjiang, Hubei Province, making it the world's largest ...

World-largest sodium-ion phosphate battery system launched, ...

The system is the first ever fully passive megawatt-hour scale battery storage system, and the first grid-scale sodium-ion storage solution ever deployed to the U.S. electric ...

World-largest sodium-ion phosphate battery system launched, ...

Peak Energy announced the launch and shipment of its sodium-ion battery energy storage system (ESS). The solution delivers a patent-pending passive cooling design to ...

World's largest sodium-ion battery energy storage ...

Recently, China Southern Power Grid stated that this technology is ushering in a new era of affordable energy storage for large-scale applications. The development and use of sodium-ion batteries can ...

Peak Energy just shipped the US's first grid-scale sodium-ion battery

Peak Energy debuts the US's first grid-scale sodium-ion battery, cutting costs and boosting reliability with passive cooling tech.

Large-scale hybrid lithium-sodium-ion BESS comes online in China

HiNa is the same company that provided the batteries for a sodium-ion BESS in Qianjiang, Hubei province, claimed as the largest BESS using that battery chemistry in the ...

World's largest sodium-ion battery energy storage ...

These batteries can be charged to 90% in just fifteen minutes. The future of large-scale energy storage belongs to sodium-ion technology. Sodium-ion batteries perform better at lower temperatures, ...

Advancements and challenges in sodium-ion batteries: A ...

Sodium is abundant and inexpensive, sodium-ion batteries (SIBs) have become a viable substitute for Lithium-ion batteries (LIBs). For applications including electric vehicles ...

Energy Storage Sodium Ion Battery Market Size, Share

The Energy Storage Sodium Ion Battery Market was valued at USD 235.8 million in 2024 and is projected to reach USD 1414.4 million by 2032, growing at a CAGR of 25.1% during the ...

Top 6 Sodium-Ion Battery Companies [2025]

Natron Energy is a U.S.-based company specializing in sodium-ion battery technology, offering an alternative to traditional lithium-ion systems. Their batteries use Prussian blue electrodes and are designed ...

Sodium Batteries for Use in Grid-Storage Systems and Electric ...

For all of these reasons, it remains unlikely that sodium can completely replace lithium for extremely small batteries. Instead, it can be used in combination with lithium for PEV ...

China Unveils First Large-Scale Sodium-Ion ...

Compared to Lithium-ion alternatives, sodium-ion batteries not only promise better performance at lower temperatures but also stand out for their large-scale energy storage capacity. These advantages position ...

Peak Energy Unveils Grid-Scale Sodium-Ion Storage System to ...

With lithium-ion supply chains under stress and battery safety still a headline risk, U.S.-based startup Peak Energy is betting on a long-overlooked chemistry: sodium-ion. The ...

Sodium-Based Energy Storage , ARPA-E

Sharp Laboratories of America and their partners at the University of Texas and Oregon State University are developing a sodium-based battery that could dramatically ...

World's largest sodium-ion battery goes into operation

The project represents the first phase of the Datang Hubei Sodium Ion New Energy Storage Power Station, which consists of 42 battery energy storage containers and 21 sets of boost

China's 1st large-scale lithium-sodium hybrid ...

(Image credit: Xinhua) China's first large-scale lithium-sodium hybrid energy storage station has been put into operation, capable of powering hundreds of thousands of homes, as sodium-ion batteries are ...

Peak Energy Plans Sodium-Ion Grid-Scale Battery Storage ...

Peak Energy designs and deploys next-gen sodium-ion energy storage that is safer, lower-cost, and more reliable. Our systems remove legacy failure points and enable ...

Hithium unveils 6.25 MWh BESS, sodium-ion ...

"This innovative approach will unlock new possibilities for energy storage systems and foster a new industry ecosystem," the manufacturer said. Sodium-ion cell for utility-scale energy storage just as ...

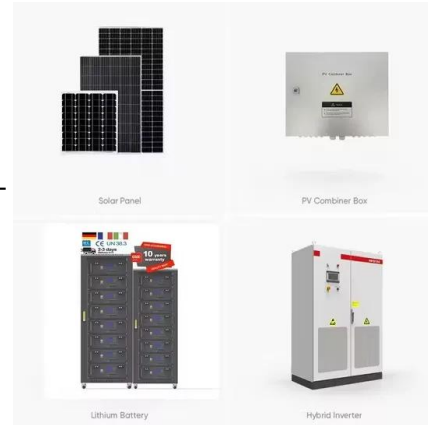

Peak Energy Delivers First Grid-Scale, Sodium-Ion ...

Peak Energy designs and deploys next-gen sodium-ion energy storage that is safer, lower-cost, and more reliable. Our systems remove legacy failure points and enable rapid grid growth to meet the ...

What Are the Leading Sodium Battery Companies in 2025?

Sodium battery companies specialize in developing energy storage systems using sodium-ion technology as a cost-effective, sustainable alternative to lithium-ion batteries. ...

China launches world's first grid-forming sodium ...

The Baochi Storage Station in Yunnan integrates lithium and sodium-ion technologies at scale, a global first, aiming to stabilize renewable energy and cut costs as China accelerates its energy

Top 6 Sodium-Ion Battery Companies [2025]

Natron Energy is a U.S.-based company specializing in sodium-ion battery technology, offering an alternative to traditional lithium-ion systems. Their batteries use ...

[Sodium-Ion Battery Companies](#)

Discover the leading sodium-ion battery companies. Learn about battery materials, performance challenges, and breakthrough developments powering grid support and electric mobility.

Peak Energy behind Colorado sodium-ion battery ...

Peak Energy, a developer of utility-scale energy storage systems, is partnering with a Colorado economic development agency to establish an engineering center in the state to focus on the advancement ...

China switches on first large-scale sodium-ion battery

China Southern Power Grid Energy Storage, the energy storage division of China Southern Power Grid, has commissioned a 10 MWh sodium-ion battery storage station in Nanning, southwestern China. The ...
