Latest polish electricity storage subsidy policy

Overview

The call for proposals of projects to be subsidised under the Energy Storage Systems scheme financed from the National Recover and Resilience Plan opened on 17 February 2025. The scheme's objective is to build a large-scale battery energy storage system (BESS). What projects are eligible for the.

The call for proposals of projects to be subsidised under the Energy Storage Systems scheme financed from the National Recover and Resilience Plan opened on 17 February 2025. The scheme's objective is to build a large-scale battery energy storage system (BESS). What projects are eligible for the.

The call for applications for the Electricity Storage and Related Infrastructure Programme, aimed at enhancing the stability of the Polish power grid, will remain open until May 30, 2025. The Polish National Fund for Environmental Protection and Water Management (NFOŚiGW) opened on April 4 a call.

On 5 March 2025, the regulation of the Minister of Climate and Environment on the detailed conditions for the granting of public aid by the National Fund for Environmental Protection and Water Management for investments in electricity storage facilities and related infrastructure was published in.

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance. The National Fund for Environmental.

The European Commission has approved a €1.2 billion Polish scheme to support investments in electricity storage facilities to foster the transition to a net-zero economy. The scheme was approved under the State Aid Temporary Crisis and Transition Framework ('TCTF'), adopted by the Commission on 9.

The European Commission (EC) has given the green light to a €1.2bn (\$1.32bn) Polish scheme designed to bolster investments in electricity storage facilities. The initiative is set to support the installation of at least 5.4GW of new electricity storage capacity. Approved under the State aid.

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion). The program is co-financed by the European Union's Modernization Fund and the Recovery and Resilience. What are Poland's energy storage subsidy programs?

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance.

Why should Poland invest in energy storage?

Development of energy production and consumption forecasting systems. Energy storage subsidy programs support the transformation of Poland's electricity grid into a more flexible and resilient system. Investments in storage facilities enable better integration of RES, improve grid stability and enhance the country's energy security.

How can energy storage facilities be improved in Poland?

Introduction of preferential loans for companies investing in energy storage facilities. Increasing the installed capacity of energy storage facilities by 300% by the end of 2025. Increasing the share of RES in Poland's energy mix to 35% in 2025. Reduction of CO2 emissions by 15 million tons per year.

What is Poland's energy storage program?

The program, "Electricity storage facilities and infrastructure for improving the stability of the Polish power grid," is aimed at companies planning to invest in energy storage facilities with a capacity of at least 2 MW and a minimum capacity of 4 MWh.

Are subsidies available for energy storage facilities?

Subsidies are available for energy storage facilities, as long as they are integrated with the energy source being implemented as part of the investment. The program provides support covering up to 20% of eligible costs. The continuation of both programs is planned with a larger budget.

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating

the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion).
