Lincoln aviator electric energy storage mode

2MW / 5MWh
Customizable

Overview

How far can a Lincoln Aviator Grand Touring drive in pure EV mode?

You will need to ensure you have enough battery range to use this mode. Lincoln has yet to say how far the Aviator Grand Touring will be able to drive in Pure EV mode on a single charge. Preserve EV: this will tell the powertrain to preserve its electric charge for later.

How many drive modes does the Lincoln Aviator have?

One of the more impressive features on the Aviator is the Lincoln Drive Modes, which are used to adjust settings related to the steering, suspension and powertrain. On the hybrid Grand Touring model, the drive mode select system comes with seven drive modes: Normal, Conserve, Excite, Slippery, Deep Conditions, Pure EV and Preserve EV.

What is a snow mode on a Lincoln Aviator?

Slippery: this is for snow, ice, rain and other slippery conditions. Putting the Aviator in this drive mode will put the stability, traction control and all-wheel drive system on high-alert, working to give you more grip when the going gets slippery. Deep Conditions: Lincoln's fancy name for a Snow mode is Deep Conditions.

What is hybrid mode on a Lincoln Aviator Grand Touring?

Lincoln says it's for a "responsive, engaging ride." In the Aviator Grand Touring, this mode will give you immediate access to all 450 hp and 600 lb-ft of torque on tap from the hybrid 3.0-liter twin-turbocharged V6. It will also allow more engine noise to penetrate into the cabin, sharpen up the steering and stiffen up the suspension.

How do I know if my aviator has a drive mode?

The drive mode select icons will appear on the Aviator's standard 12.3-inch LCD instrument cluster, clearly displaying each mode to the driver so they do

not have to take their eyes off the road entirely. The drive modes can also be changed on the fly, of course.

How do I select a drive mode on a Ford aviator?

Users can select which drive mode they want to be in using a rotary dial located in the center console area of the Aviator's cabin. The drive mode select icons will appear on the Aviator's standard 12.3-inch LCD instrument cluster, clearly displaying each mode to the driver so they do not have to take their eyes off the road entirely.
