Mendi energy storage

Overview

What is the British Mendi battery energy storage project?

On August 25, the largest energy storage project in Europe developed by China Huaneng Group Co., Ltd.—the British Mendi Battery Energy Storage Project began cold commissioning. This marked the project's entry into the final stage of development and is scheduled to be put into commercial operation by the end of the year.

What is the Mendi project?

The Mendi project is the first energy storage project built by a Chinese power company in a developed country. It is jointly funded by China Huaneng and Guoxin International, and is operated and managed by Huaneng Hong Kong. The project is located near Mendy Town, Wiltshire, England, with a planned installed capacity of 99.8 MW.

Is the Mendi Project Safe?

So far, no health, safety or environmental accidents have occurred in the Mendi project. In recent years, with the rapid development of renewable energy in the UK, the intermittent and volatility of power output has led to an increasingly prominent imbalance in power supply and demand.
