National development energy storage joint venture

CE UN38.3 

Overview

National Grid (NYSE: NGG), one of the largest investor-owned utility companies in the world, announced today that its Emerald Energy Venture, LLC joint venture has secured an innovative \$150 million Portfolio Revolving facility, with an accordion feature that will allow an increase to \$250 million.

National Grid (NYSE: NGG), one of the largest investor-owned utility companies in the world, announced today that its Emerald Energy Venture, LLC joint venture has secured an innovative \$150 million Portfolio Revolving facility, with an accordion feature that will allow an increase to \$250 million.

National Grid announced today that its Emerald Energy Venture, LLC joint venture has secured an innovative \$150 million Portfolio Revolving facility, with an accordion feature that will allow an increase to \$250 million beginning in mid-2022; to support the growth of its renewable energy portfolio. What is the long-duration energy storage demonstration initiative?

The Long-Duration Energy Storage Demonstration Initiative is a program designed to establish a demonstration initiative composed of demonstration projects focused on the development of long-duration energy storage technologies.

What is the DOE/DoD long-duration energy storage joint program (LDEs)?

DOE/DOD Long-Duration Energy Storage Joint Program: These projects will demonstrate LDES technologies on government facilities through collaboration between DOE and Department of Defense (DOD).

What is the long-duration energy storage portfolio?

The Long-Duration Energy Storage portfolio helps to advance LDES systems toward widespread commercial deployment. The goal of this portfolio is to fund projects that will overcome the technical and institutional barriers that exist for deployment, with a focus on different technology types for a diverse set of regions.

What is National Grid's \$150 million portfolio revolving facility?

National Grid announced today that its Emerald Energy Venture, LLC joint venture has secured an innovative \$150 million Portfolio Revolving facility, with an accordion feature that will allow an increase to \$250 million beginning in mid-2022; to support the growth of its renewable energy portfolio in the U.S.

What is the difference between manufacturing and deployment of energy storage systems?

Manufacturing: Projects that manufacture energy storage systems for a variety of residential, commercial, and utility scale clean energy storage end uses. Deployment: Projects that deploy residential, commercial, and utility scale energy storage systems for a variety of clean energy and clean transportation end uses.

Why do we need energy storage technologies?

From providing critical backup power during natural disasters to supporting more renewable energy coming online, energy storage technologies make the grid more flexible and resilient. Today's energy storage technologies are not sufficiently scaled or affordable enough to meet energy demand that fluctuates throughout the day and night.
