Poland s 14th five-year energy storage plan

Lithium Solar Generator: S150

Overview

Poland has just rolled out one of Europe's most ambitious energy storage programmes - a €980 million initiative that's set to transform the country's grid infrastructure. The Polish Ministry of Climate and Environment has finalised this landmark subsidy scheme, targeting over 5 GWh of new storage.

Poland has just rolled out one of Europe's most ambitious energy storage programmes - a €980 million initiative that's set to transform the country's grid infrastructure. The Polish Ministry of Climate and Environment has finalised this landmark subsidy scheme, targeting over 5 GWh of new storage.

On 2nd February 2021 the Council of Ministers have adopted the Energy policy of Poland until 2040 (EPP2040). The document presents an ambitious, consistent and responsible way of carrying out the energy transformation of Poland. The Energy Policy of Poland until 2040 takes into account changes in.

A total of PLN 4 billion (\$1 billion) will be distributed under the subsidy scheme by the end of 2025 in a bid to bring online more than 5 GWh of energy storage projects by 2028. From ESS News Following a public consultation launched in July 2024, the Polish Ministry of Climate and Environment has.

On March 7, 2025, the Polish Ministry of Climate and Environment announced the completion of a 5 GWh energy storage subsidy plan. The program aims to support the deployment of energy storage facilities with capacities exceeding 5 GWh, with a budget of up to 4 billion zloties, funded by a. What is Poland's energy storage subsidy?

Learn about Poland's €1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

When will Poland complete a 5 GWh energy storage subsidy plan?

On March 7, 2025, the Polish Ministry of Climate and Environment announced the completion of a 5 GWh energy storage subsidy plan.

What is Poland's energy storage program?

The program , “Electricity storage facilities and infrastructure for improving the stability of the Polish power grid,” is aimed at companies planning to invest in energy storage facilities with a capacity of at least 2 MW and a minimum capacity of 4 MWh.

Why should Poland invest in energy storage?

Development of energy production and consumption forecasting systems. Energy storage subsidy programs support the transformation of Poland’s electricity grid into a more flexible and resilient system. Investments in storage facilities enable better integration of RES, improve grid stability and enhance the country’s energy security.

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion).

How can energy storage facilities be improved in Poland?

Introduction of preferential loans for companies investing in energy storage facilities. Increasing the installed capacity of energy storage facilities by 300% by the end of 2025. Increasing the share of RES in Poland’s energy mix to 35% in 2025. Reduction of CO2 emissions by 15 million tons per year.
