Powin energy storage video

Overview

Does powin sell energy storage systems?

Powin currently sells energy storage systems directly to customers but will trial leasing options in 2020. It can sell DC stacks - a housing containing Li-ion modules for indoor use - or a turnkey, containerised energy storage system for outdoors, in DC or AC configurations.

What is powin's new battery energy storage platform?

Powin LLC has announced its new Centipede battery energy storage platform. It is Powin's first fully modular design, complete with pre-integrated segments containing batteries, thermal management equipment, and essential safety systems.

How does powin energy work?

Powin Energy designs and assembles battery modules, packs and the final turnkey energy storage system using naked cells outsourced from battery makers in China. A controller is added to each module to balance charge across cells, and to each pack to balance charge across modules.

When did powin start R&D for stationary energy storage?

Powin Corp began R&D for stationary energy storage in 2011, which became the sole focus in 2016. Despite its previous business being unrelated to energy, the company developed an expertise in supply chain logistics in Asia and applied this to its energy storage business.

Will powin double its energy storage capacity in 2021?

Powin has 200MWh of energy storage commissioned YTD, and expects to double this in 2020 with an additional 200MWh-300MWh; it projects a further doubling of contracted energy storage in 2021. In the USA, Powin is targeting California, Arizona, Hawaii, Massachusetts and New York.

What is the Powin battery lab?

Established in 2020 within the heart of our Oregon-based Engineering headquarters, the Powin Battery Lab relies on the latest testing facilities, equipment, and experienced specialists to enable better performance guarantees, warranties, control processes, and strategies for each of our products.
