Sonata hybrid energy storage device model

Overview

This study aims to develop a hybrid energy storage system (HESS), targeting a commercialised Hybrid Electric Vehicle model (Hyundai Sonata), that consists of battery and supercapacitor cells, to evaluate its benefit.

How does a Hyundai Sonata Hybrid work?

The Sonata Hybrid's battery operates through regenerative braking and engine charging. Kinetic energy from deceleration is converted into electricity, stored in the battery. During acceleration or low-speed driving, the electric motor supplements or replaces the gas engine, reducing fuel consumption.

How long does a Hyundai Sonata Hybrid battery last?

What Is the Lifespan of a Hyundai Sonata Hybrid Battery?

Most Hyundai Sonata Hybrid batteries last 8-10 years under normal driving conditions. Hyundai guarantees 70% capacity retention for 10 years/100,000 miles under its warranty. Factors like extreme temperatures, frequent deep discharges, and lack of maintenance can shorten lifespan.

What is a hybrid energy storage system?

The hybrid energy storage system composed of an energy-type energy storage device and a power-type energy storage device is an efficient system for energy and power management that gives full play to the durability of the energy-type energy storage and the rapidity of the power-type energy storage.

How much mpg does a Hyundai Sonata SEL get?

The Sonata Hybrid SEL, our test car, has an EPA estimate of 47 mpg in combined city/highway driving. That's right about what the other top-performing midsize hybrid sedans get.

What type of battery is best for a Hyundai Sonata?

High-performance sealed AGM battery suitable for motorcycles and

snowmobiles. Rechargeable SLA AGM battery with 320 CCA, ideal for various powersport applications. Sealed SLA/AGM battery for ATVs and motorcycles, maintenance-free with advanced technology. What Is the Lifespan of a Hyundai Sonata Hybrid Battery?

.

Is the Hyundai Sonata Hybrid a good car?

The Sonata Hybrid's suspension absorbs impacts well without being overly floaty or soft when you take on curvy roads. The climate control system blows strong and cold at its max and is very effective at regulating cabin temperature in auto mode. Surprisingly, road and wind noise is higher than average.
