# Special energy storage poland

## Overview

---

The Polish National Fund for Environmental Protection and Water Management (NFOŚiGW) opened on April 4 a call for applications to co-finance energy storage facilities. The much-awaited subsidy scheme aims to improve the stability of the national power grid and the country's energy security. What are Poland's energy storage subsidy programs?

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance.

What is Poland's energy storage program?

The program, "Electricity storage facilities and infrastructure for improving the stability of the Polish power grid," is aimed at companies planning to invest in energy storage facilities with a capacity of at least 2 MW and a minimum capacity of 4 MWh.

Why should Poland invest in energy storage facilities?

Investments in energy storage facilities are key to Poland's energy transition. They increase the flexibility of the energy system and promote the integration of renewable energy sources into the grid.

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion).

How can energy storage support Poland's electricity system?

By addressing challenges such as peak load balancing and frequency regulation, energy storage enhances the resilience and flexibility of Poland's electricity system. The storage support program is expected to begin

accepting applications in the second quarter of 2025. Full details and deadlines will be published by the NFOŚiGW.

How will Poland improve its energy security?

To improve the stability of the Polish electricity grid. Increasing the country's energy security. It is planned to connect storage facilities with a capacity of 2500 MW and 5000 MWh. The program runs from 2024-2028. Funding agreements will be signed until December 31, 2025. Funds will be disbursed by December 31, 2028.
