# **State grid corporation of china energy storage cloud**

## Overview

---

State Grid Corporation of China (State Grid) launched a new energy cloud platform on April 20 to support China's goal to peak carbon dioxide emissions before 2030 and become carbon neutrality by 2060, and help build the new energy-centered power system. Who is State Grid Corporation of China?

State Grid Corporation of China was founded on 29 December 2002 with investments, construction and operation of power grids as its core business. It is committed to meeting energy demands with clean and green alternatives, through new electrifications and energy connectivity solutions.

Is state Grid the future of China's Energy Transformation?

This article was originally published in the Brand Finance China 500 2025 report. State Grid remains at the forefront of China's energy transformation initiatives by utilising the smart grid as a central platform.

How is State Grid transforming energy distribution?

Through the development of energy internet (a futuristic evolution of the electricity network) infrastructure, including virtual power plants and smart charging stations, State Grid is improving energy distribution and accelerating the shift towards cleaner consumption at the user level.

## State grid corporation of china energy storage cloud

### Lithium battery parameters

Product capacity: 100Ah

Product size: 135\*197\*35mm

Product weight: 1.82kg 197mm / 7.7in

Product voltage: 3.2V

internal resistance: within 0.5

### State Grid Corporation of China: A Powerhouse ...
