

JH Solar

Sungrow energy storage engineer

Overview

As a principal engineer you will focus on technical design and ESS customized solution proposal to support the delivery of the energy storage (mainly battery energy storage system--BESS) assignment and take a leading position in supporting Sungrow ESS European market and development. What is Sungrow solar & energy storage system?

Relying on Sungrow's integrated solar plus storage solution, this plant is able to provide clean electricity with constant power in the long run, and helps improve the overall stability and security of Thai power grid. Sungrow's Liquid Cooled Energy Storage System Better Supplies the BESS Plants.

How do I become a Sungrow engineer?

Proactively keep abreast of all technical updates on Sungrow products and underlying technologies. 1. Minimum of a Bachelor's degree in Electrical, Electronics, Power Systems, Automation or related engineering, Master's degree a plus. 2. Minimum of five (5) years of experience in the renewable energy industry.

What makes Sungrow a great C&B company?

Sungrow will pursue a C&B structure with high competitiveness in the global market. With the combination of long term and short term incentive plans, employees will be inspired to achieve greater goals. As an IT Specialist, I will devote my resources to keep our networks and data safe.

Why should you work at Sungrow?

Employees could demonstrate personal values and pursue a clean and sustainable future with sungrow. Sungrow is embracing the great opportunity of our rapid globalization, even though the world is a place of increasingly complex challenges. We look forward to the ambitious and confident you to create a bright future with us.

How can I contact Sungrow?

For contacting Sungrow, you can use the following methods: Phone: +1-833-SGPOWER (747-6937) Mail: techsupport@sungrow-na.com.

Why does Sungrow have a continuous talent development system?

For the purpose of promoting employees' development and fulfilling their dreams, Sungrow has established a series of continuous talent development systems. Sungrow will pursue a C&B structure with high competitiveness in the global market.
