# Super energy storage project

## Overview

---

What is super energy?

As the IPP, Super Energy prioritizes the plant's long term efficient, safe and stable operation. Sungrow will supply its industry-leading PV plus ESS solution, incorporating the most advanced liquid-cooled energy storage system, which can significantly save on delivery and installation costs and prolong the overall life of the system.

Why is EVE Energy building a super energy storage plant?

The 60GWh Super Energy Storage Plant Facilitates Mass Production To support the mass production of Mr. Big's large battery cells, EVE Energy is committed to building a world-class super energy storage plant.

How much power does super energy produce?

The project comprises of a 49.01 megawatt (MW) photovoltaic (PV) inverter solution and a 45 MW/136.24MWh battery energy storage system. With the addition of this project, Super Energy's power generation capacity supplied to the commercial power system hit 359MW.

What is super energy & Sungrow cooperation?

This agreement was the driver for Super Energy and Sungrow's cooperation on this major Thai BESS project. Besides, this plant is also a pioneer of SPP Hybrid Firm Power Purchasing Program, an initiative launched by Electricity Generating Authority of Thailand, aiming to make renewable energy the stable supply of future power.

Why should you choose super energy?

As a result of the integrated solution, Super Energy harvests the greatly-reduced LCOS and the improved plant stability and efficiency. What is more, by promising the smooth progress with the customer-oriented services and quick delivery, Sungrow injects more confidence to Super and won its best

trust.

Who are super energy & Sungrow?

As two major players in the global new energy arena, Super Energy and Sungrow have been strategic partners for six years and jointly completed several successful projects in Southeast Asia, such as the 330 MW PV project in Vietnam last year. The cumulative cooperation has achieved GW scale.
