The country talks about energy storage

Overview

The US energy storage market just posted its strongest Q1 ever, adding more than 2 gigawatts (GW) of capacity across all segments, according to the latest US Energy Storage Monitor from Wood Mackenzie and the American Clean Power Association (ACP). That makes Q1 2025 the biggest first quarter for.

The US energy storage market just posted its strongest Q1 ever, adding more than 2 gigawatts (GW) of capacity across all segments, according to the latest US Energy Storage Monitor from Wood Mackenzie and the American Clean Power Association (ACP). That makes Q1 2025 the biggest first quarter for.

China's energy storage sector is rapidly expanding. As a solution to balancing the country's growing energy needs and mass renewable energy production, the industry has attracted investments worth hundreds of billions of yuan (tens of billions of dollars). This has seen China become the world's.

Ever wondered why your social media feed suddenly has politicians raving about giant batteries and grid upgrades?

From the U.S. Inflation Reduction Act to China's 14th Five-Year Plan, governments worldwide are throwing money at energy storage like it's the last slice of pizza at a tech bro meetup.
