## Overview

---

The Energy Storage Association (UK) (ESA) is a dynamic new member-supported trade body. We represent the critical role of energy storage to support the cost-effective transition to a resilient and secure clean energy system. The ESA will represent the entire energy storage value chain. This.

The Energy Storage Association (UK) (ESA) is a dynamic new member-supported trade body. We represent the critical role of energy storage to support the cost-effective transition to a resilient and secure clean energy system. The ESA will represent the entire energy storage value chain. This.

A new era for renewable power and energy security begins today (Tuesday 8 April) as Ofgem launches a new cap and floor investment support scheme, unlocking billions in funding to build major Long Duration Electricity Storage projects for the first time in 40 years. Long Duration Electricity Storage.

Highview Power has secured a £300 million investment to build the UK's first commercial-scale liquid air energy storage (LAES) plant. This funding comes from the UK Infrastructure Bank, Centrica and a consortium of investors including Rio Tinto, Goldman Sachs, KIRKBI and Mosaic Capital. The new.

Long Duration Electricity Storage investment support scheme will boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure. This could see the first.

Highview Power has secured the backing of the UK Infrastructure Bank and the energy industry leader Centrica with a £300 million investment for the first commercial-scale liquid air energy storage (LAES) plant in the UK. The £300 million funding round was led by the UK Infrastructure Bank (UKIB).

The UK's solar energy and battery storage sector is undergoing a rapid transformation, bolstered by ambitious climate targets and supportive policies. Solar photovoltaics (PV) capacity has rebounded since the end of feed-in tariffs, while energy storage is scaling up to enhance grid reliability.

The government of the UK has launched a new investment support scheme aimed at bolstering the country's energy storage infrastructure. The initiative aims to encourage the development of long-duration energy storage (LDES) facilities, which have not seen significant investment in nearly four decades. What is the UK's energy storage Investment Support Scheme?

Credit: David Pimborough / Shutterstock. The government of the UK has launched a new investment support scheme aimed at bolstering the country's energy storage infrastructure. The initiative aims to encourage the development of long-duration energy storage (LDES) facilities, which have not seen significant investment in nearly four decades.

What is the long duration energy storage Investment Support Scheme?

Long Duration Electricity Storage investment support scheme will boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure.

Could a new energy storage scheme help the UK achieve energy independence?

The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure. This could see the first significant long duration electricity storage (LDES) facilities in nearly 4 decades, helping to create back up renewable power and bolster the UK's energy security.

What if the UK has a strong energy storage industry?

If the UK establishes a strong domestic energy storage industry, it can export storage capacity and technologies. Storage would reduce the UK's dependence on costly, polluting and uncertain fossil fuel imports. Great Britain currently has 2.8 gigawatts (GW) of LDES across four Pumped Storage Hydro (PSH) facilities in Scotland and Wales.

Is the UK's solar and energy storage sector at an inflection point?

In conclusion, the UK's solar and energy storage sector finds itself at an inflection point – bolstered by supportive policy, buoyant investment, and rapid tech improvements, yet challenged by infrastructure bottlenecks and the practicalities of an unprecedented build-out.

Could long duration electricity storage be the UK's first energy storage facility?

This could see the first significant long duration electricity storage (LDES) facilities in nearly 4 decades, helping to create back up renewable power and bolster the UK's energy security. These technologies work like giant batteries by storing renewable energy and releasing it onto the grid and into homes when needed.

## Uk commercial energy storage investment

---

### Uk commercial energy storage investment

Louise Dalton is partner, energy & climate change at CMS, which has been advising developers and investors in relation to the deployment of energy storage in the UK (including equity and ...

### UK energy storage in 2024: What's the state of play?

UK energy storage in 2024: What's the state of play? The UK energy storage market is proving attractive to investors, but more due diligence is required to maximise revenues

### Ofgem super-charging clean power storage for first time in 40 years

Ofgem has launched a new cap and floor investment support scheme, unlocking billions in funding to build major Long Duration Electricity Storage projects for the first time in ...

## Home

We envision a world where energy storage is the backbone of a resilient, affordable, and net-zero energy system. As the leading trade body for energy storage, we are committed to driving ...

- LiFePO<sub>4</sub>
- Wide temp: -20°C to 55°C
- Easy to expand
- Floor mount & wall mount
- Intelligent BMS
- Cycle Life: ≥6000
- Warranty : 10 years

## UK investment scheme to boost energy storage ...

The government of the UK has launched a new investment support scheme aimed at bolstering the country's energy storage infrastructure. The initiative aims to encourage the development of long ...

## UK Infrastructure Bank, Centrica & Partners Invest ...

Highview Power has secured the backing of the UK Infrastructure Bank and the energy industry leader Centrica with a £300 million investment for the first commercial-scale liquid air energy storage ...

## Major Investment in UK's First Commercial Liquid Air Energy ...

Highview Power has secured a £300 million investment to build the UK's first commercial-scale liquid air energy storage (LAES) plant. This funding comes from the UK ...

## Major Investments Accelerate UK Battery Storage Expansion

Two leading UK-based energy firms, AMP Clean Energy and Pulse Clean Energy, have announced major investment milestones in August 2025, securing a combined ...

## UK solar and energy storage market report 2025

In conclusion, the UK's solar and energy storage sector finds itself at an inflection point - bolstered by supportive policy, buoyant investment, and rapid tech improvements, yet challenged by infrastructure ...

## Uk commercial energy storage investment

Long-duration energy storage company Highview Power has secured a £300 million investment - from UK Infrastructure Bank, Centrica and a syndicate of additional investors - for the first ...

## New scheme to attract investment in renewable energy storage

Government will unlock investment opportunities in vital renewable energy storage technologies to strengthen energy independence, create jobs and help make Britain a ...
