Which energy storage smart lock is the best

Overview

Enter the self-generating energy storage smart lock, the tech marvel that's turning security systems into mini power plants. By 2026, the energy storage market for smart devices is projected to hit \$15.2 billion globally [9], and these locks are leading the charge. Imagine a lock that harvests.

Enter the self-generating energy storage smart lock, the tech marvel that's turning security systems into mini power plants. By 2026, the energy storage market for smart devices is projected to hit \$15.2 billion globally [9], and these locks are leading the charge. Imagine a lock that harvests.

After rigorously testing more than a dozen models with nearly as many testers, I selected the Level Lock+ Connect as the best smart lock overall. It looks like a standard lock, but hides away myriad smart functions. Another top pick, the Lockly Vision Zeno, can keep an eye on things for you in real.

It's 2025, and smart locks with the best battery life have quickly become more of a necessity than a luxury. After all, a high-tech lock isn't very smart if it runs out of juice when you need it most. That's why today, we're diving into the smart locks with the best battery life—the ones that go.

If you're tired of swapping out batteries every few months or are researching your first smart lock purchase, this guide will walk you through the best options for long battery life, explain why some locks last longer, and help you make a confident decision. ☐☐ 1. Schlage Connect Smart Deadbolt. What is the best smart lock?

After rigorously testing more than a dozen models with nearly as many testers, I selected the Level Lock+ Connect as the best smart lock overall. It looks like a standard lock, but hides away myriad smart functions. Another top pick, the Lockly Vision Zeno, can keep an eye on things for you in real time thanks to its built-in 2K camera.

Do smart locks use rechargeable batteries?

Some of the smart locks on our list use rechargeable batteries, which may

take a little bit to recharge, while others use a battery you should plan to swap out every so often. The top pick, the Level Lock+ Connect, doesn't offer rechargeable batteries. In general, look for a battery life of at least six months, but ideally 12 months.

Are smart locks a good upgrade?

Smart locks are an incredible upgrade over the old way of doing things, and these are our top picks in several categories. TechHive's editors and contributors have been testing smart locks since the very first models came to market, and we continuously evaluate the latest models along with their accompanying apps.

How long does a smart lock last?

In general, look for a battery life of at least six months, but ideally 12 months. Safety comes first, of course, making sure that the smart lock looks good on your door is also important. Because the smart lock is such a prominent feature on your door, pick one that matches in terms of style and color.

Are smart locks safe?

The smart locks we recommend are as safe as or safer than their mechanical counterparts (which, for instance, can't alert you when your front door is unlocked or opened). The Schlage Encode Smart WiFi Deadbolt and Schlage Encode Smart WiFi Lever are both ANSI Grade 1 and BHMA AAA. The Yale Assure Lock 2 is ANSI Grade 2.

Are smart locks better than regular deadbolts?

That's because even if the physical hardware is not going to do any better or worse at preventing a door from being smashed in, most smart locks are harder to pick than regular deadbolts, and best of all, many of them can inform you if they are breached unexpectedly.
