Xinte energy storage technology

Overview

Xinte Energy's energy storage technology is instrumental in enhancing the efficiency of energy distribution, supporting grid operations, and facilitating higher penetration of renewable sources into the energy mix. Where is Xinte energy planning a new polysilicon production plant?

PV Tech recently highlighted that Xinte Energy planned a major new polysilicon production plant in city of Baotou, Inner Mongolia, which would be capable of producing 200,000MT per annum. Image: Xinte Energy.

Will Xinte energy supply Qinghai Gaojing solar energy technology co?

Xinte Energy will supply Qinghai Gaojing Solar Energy Technology Co with a total of 152,400MT of polysilicon from July 2021 to December 2025. In typical fashion, prices would be negotiated on a monthly basis.

How much money will Xinte Energy Invest in China?

TBEA said around RMB8.8 billion will come from the initial public offering of Xinte Energy on China's stock market while the remaining amount will come from bank loans.

Will Xinte energy expand its polysilicon capacity?

TBEA-owned Xinte Energy 's poly division has announced it will invest around RMB17.6 billion (US\$2.8 billion) to expand its polysilicon capacity by another 200,000 metric tons. The expansion plan approved by the board of TBEA today envisages the construction of a new factory in Changji county, in the Xinjiang Uygur autonomous region.

Where is Xinte's new factory located?

Xinte's new manufacturing facility is planned to be located in Changji county, in the Xinjiang Uygur autonomous region. Moreover, Longi is planning to build another factory in Erdos City, Inner Mongolia.
