Yinlong lithium battery energy storage

Overview

How long do Yinlong LTO batteries last?

The fast-charging Yinlong LTO battery cells can operate under extreme temperature conditions safely. These Lithium-Titanate-Oxide batteries have an operational life-span of up to 30 years thereby making it a very cost-effective energy solution.

Where is Yinlong energy based?

Yinlong Energy provides energy storage, electric transportation, and electric charger systems. This is the regional office of Yinlong Energy - China and are based at the Jebel Ali Free zone in Dubai.

What are Yinlong lithium-titanate-oxide batteries?

Yinlong lithium-titanate-oxide batteries boast an expansive operating temperature range from -40°C to $+60^{\circ}\text{C}$. Excelling in both extreme cold and hot conditions, these batteries operate optimally without the necessity for any supplementary equipment to sustain their functionality.

What does Yinlong energy do?

Yinlong Energy's mission is to drive global new energy technology by providing LTO battery, LTO storage, and LTO transportation solutions that support economic development while protecting the environment. As a result, the company has been recognised with multiple awards and is considered one of the world's top 500 energy companies.

Are Yinlong LTO batteries safe?

Watch our batteries undergoing a series of rigorous tests, including cutting, drilling, penetration, dropping, exposure to high temperatures, and resistance to gasoline flames. The fast-charging Yinlong LTO battery cells can operate under extreme temperature conditions safely.

What is a lithium titanate battery?

Lithium-Titanate batteries designed for rapid charging capabilities. Reliable performance in adverse temperature conditions. Impressive operational lifespan of up to 30 years. City and highway electric buses for public transportation. Long-distance electric coaches for comfortable intercity travel.
