# **Yuan energy storage power generation project bidding**

## Overview

---

How fast will China's new energy storage develop in 2023?

Bian Guangqi, deputy director of the Department of Energy Conservation and Scientific and Technological Equipment of the National Energy Administration of China, introduced at a press conference on the 25th that China's new energy storage will develop rapidly in 2023, with an installed capacity of more than 30 million kilowatts in operation.

How does China's new energy storage capacity affect economic development?

From the perspective of investment scale, since the "14th Five-Year Plan", the new new energy storage capacity has directly promoted economic investment of more than 100 billion yuan, driving the further expansion of the upstream and downstream of the industrial chain, and becoming a "new driving force" for China's economic development.

How many kilowatts is China's new energy storage capacity?

China's new energy storage has been put into operation with an installed capacity of more than 30 million kilowatts, and Bian Guangqi, deputy director of the Energy Conservation and Science and Technology Equipment Department of the National Energy Administration of China, introduced at a press conference on the 25th that in 2023.

Who is the tenderer of Xiahua energy project?

According to the announcement, the tenderer is Henan Juyi Energy Management Co., Ltd., with a project capital of 127,000 yuan. The construction scale of this project is 400MW/800MWh, using lithium iron phosphate batteries.

How many kilowatts will a new energy storage project take?

Bian Guangqi pointed out that by the end of 2023, the cumulative installed capacity of new energy storage projects that have been completed and put

into operation across the country will reach 31.39 million kilowatts, with an average energy storage time of 2.1 hours.

How does Huadian procurement work?

Similar to previous tenders, Huadian's procurement does not only involve the supply of 0.5 C and 0.25 C LFP batteries, but also covers installation guidance, with a battery cell capacity of at least 314 Ah and an overall warranty of five years.
