Overview

Does Zambia export electricity?

Electricity imports and exports in GWh (first half of 2022) As mentioned in the previous chapter, Zambia has developed into an export powerhouse in recent years. This is also demonstrated by the data from the first half of 2022.

Does Zambia have a good solar system?

Zambia benefits from excellent solar resources, with a specific production output between 1,600 and 1,800 kWh/kWp per year. The regions with the best re-sources are the south-west part of the country as well as the region around Lake Bangweulu, east of Mansa.

Does Zambia need hydropower?

In recent years, Zambia has been able to improve its electricity supply but remains largely dependent on hydropower. This dependency represents a risk to the security of supply, as evidenced by the return of scheduled load shedding at the end of 2022 until February 2023, due to low water levels on the Zambezi River.

Where does Zambia import its goods?

The main source countries for Zambia's imports are South Africa, China, United Arab Emirates (UAE), India and DRC. As a member of the multilateral trade system, Zam-bia is signatory to several regional and global trade arrangements.

Is Zambia a copper producer?

Zambia is the second largest producer of copper in Africa and its economy is heavily dependent on copper mining (at least 70% of total exports). Efforts to diversify economic activity or invest revenues from mining to other sectors of the economy have been limited.
